Time to complete

A. General information about the respondent

1. * Country

Niger

2. * Name of organization(s) or entity(s) responsible for the preparation of the report

Ministère de l'Enseignement Supérieur de la Recherche et de l'Innovation Technologique

3. * Website of organization(s) or entity(s) responsible for the preparation of the report

www.gouv.ne

4. * Email address of organization(s) or entity(s) responsible for the preparation of the report

en cours de développement

5. Phone number of organization(s) or entity(s) responsible for the preparation of the report

6. Please describe the role/mandate of your organization

Promouvoir l'Enseignement Supérieur, la Recherche et l'Innovation Technologique

7. * Full name of officially designated contact person(s) who completed this survey

Dr MAHAMANE GALADIMA Moustapha

8. * Position of officially designated contact person(s) who completed this survey

Directeur de l'Innovation Technologique

9. * Email address of officially designated contact person(s) who completed this survey

10. Full Name(s) of designated official(s) certifying the report

HAMIDOU TALIBI Moussa

11. Brief description of the consultation process established for the preparation of the report

Dans le cadre de l'élaboration de ce rapport deux réunions (en ligne) ont été organisées pour aider les parties prenantes à renseigner ledit rapport.

12. * Name of other organization(s) or entity(ies) (including non-governmental) consulted for completing this survey

Ministère du Commerce et de l'Industrie, Initiative pour l'Arbre, Jeune volontaire pour l'Environnement

13. * Website of other organization(s) or entity(ies) (including non-governmental) consulted for completing this survey (Please use commas to separate multiple links, as: link A, link B)

en cours de développement

14. * Email address of other organization(s) or entity(ies) (including non-governmental) consulted for completing this survey

15. Sector of other organization(s) or entity(ies) (including non-governmental) consulted for completing this survey

B. QUESTIONNAIRE FOR MEMBER STATES' REPORTING

ON THE IMPLEMENTATION OF THE 2021 RECOMMENDATION ON OPEN
SCIENCE

Part 1. PROMOTING A COMMON UNDERSTANDING OF OPEN SCIENCE,

ASSOCIATED BENEFITS AND CHALLENGES, AS WELL AS DIVERSE PATHS TO
OPEN SCIENCE

16. 1.1 Has the 2021 UNESCO Recommendation on Open Science been promoted and/or shared with appropriate ministries and institutions as well as affiliated organizations in your country?

☐ Yes

☒ No

17. 1.1 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

La recommandation 2021 n'a pas pu être largement diffusée auprès des ministères et institutions concernées du fait du retard accusé dans la désignation du point focal et l'urgence de renseigner le présent rapport. Juste quelques structures ont été informées et ont pris part à la session de formation en ligne organisée par le point focal et le bureau de l'UNESCO à Dakar, présentée par le bureau de l'UNESCO Dakar.

18. 1.2 Is the 2021 Recommendation on Open Science available in the national language(s) of your country?

☐ Yes

☒ No

19. 1.3 Have there been awareness raising activities on open science, including all its key elements[i], associated benefits and challenges, organized or foreseen to be organized by the end of 2025 in your country by national authorities or entities? (ref.: (i) 16.f, 16.g, 16.h)

[i] Please refer to the elements of open science defined in the 2021 Recommendation, namely : open scientific knowledge (including open access to scientific publications, research data, open educational resources, open-source software and code, open hardware), open science infrastructures, open engagement of societal actors and open dialogue with other knowledge systems.

☐ Yes

☒ No

20. 1.4 Have specific actions been undertaken or are planned to be undertaken by end of 2025 in your country to incorporate the values and principles of open science[i], in publicly funded research? (ref.: (i) 16.a, 16.b, 16.c, 16.d, 16.e, 16.h)

[i] The 2021 Recommendation outlines a set of shared values of open science stemming from the rights-based, ethical, epistemological, economic, legal, political, social, multi-stakeholder and technological implications of opening science to society and broadening the principles of openness to the whole cycle of scientific research. It also provides a set of guiding principles, as a framework for enabling conditions and practices, which uphold the values of open science and can realize the ideals of open science.

Please see the values of open science, namely quality and integrity, collective benefit, equity and fairness, and diversity and inclusiveness.

Please see the guiding principles for open science ,namely transparency, scrutiny, critique and reproducibility; equality of opportunities; responsibility, respect and accountability; collaboration, participation and inclusion; flexibility and sustainability.

☐ Yes

☒ No

21. 1.4. cont. If **no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Retard dans la désignation du point focal science ouverte, Manque de formation pour le point focal, Faible diffusion des valeurs et les principes de la science ouverte, Manque de stratégie de diffusion des valeurs et les principes de la science ouverte

Part 2. DEVELOPING AN ENABLING POLICY ENVIRONMENT FOR OPEN SCIENCE

22. 2.1 Does your country have a national policy[i], strategy or plan of action on science, technology and innovation (STI)?

[i] National STI policy is most commonly a governmental document developed by governing bodies leading the STI policy design and implementation in a given country, which formulates objectives and guides actions and decision-making processes in the area of STI on the national level.

☒ Yes

☐ No

23. 2.1 cont. **If yes**

· please share a machine-readable PDF file of the policy using this link: <https://tinyurl.com/27p5zct8> designating openscience@unesco.org as the recipient, and provide the following information: *Title of the policy, the authority in charge of development of the policy, entities involved and the process of development, year of adoption, year of last update, key areas/sections of the policy, and links to the webpage if available.*

In the comment box, please indicate the question number for this attachment / document.

After uploading, please return to this page to continue the survey.

Titre: Politique Nationale en matière de Sciences, de Technologie et d'Innovation du Niger (POSTINI), autorité chargée de l'élaboration de la politique: Ministère de l'Enseignement Supérieur, de la Recherche et de l'Innovation, entités ayant participé au processus d'élaboration: Les Ministère sectoriels, les structures et institutions de recherche et d'innovation technologiques etc., année d'adoption: 2020

24. 2.1 cont. **If yes:**

- does it include any of the following open science elements:

- ☒ open access to scientific knowledge
- ☐ open science infrastructure
- ☐ open engagement of societal actors
- ☐ open dialogue with other knowledge systems

25. 2.2 In your country, is there a policy, or a set of policies and/or legal framework(s)[i] at the national level that address open science or any of its key elements in line with the definition, values and principles outlined in the 2021 Recommendation on Open Science? (*ref.: (i) 16.a, 16.b, 16.c, 16.d, 16.e, 16.h*)

[i] These can include specific national policies, sets of guidelines, rules, regulations, laws, principles, or directions to govern open science practices.

- ☐ Yes
- ☐ Partly
- ☒ No

26. 2.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such policies.

Le Ministère de l'enseignement supérieur de la recherche et de l'innovation technologique du Niger a été saisi récemment sur ces recommandations sur la science ouverte, et a récemment désigné un point focal pour la science ouverte

27. 2.3 In your country, are there specific policy instruments[i] that aim to promote open science?

[i] Policy instruments include programmes, methods and mechanisms of technical and operational nature, required to solve the issues set by the policy, with focus on the target beneficiaries, resources, indicators, and set of goals for delivering products (short term), results (medium-term), and impacts (long term).

- ☐ Yes
- ☐ Under development
- ☒ No

28. 2.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such policy instruments.

Le Ministère Le Ministère de l'enseignement supérieur de la recherche et de l'innovation technologique du Niger a été saisi récemment sur ces recommandations sur la science ouverte, et a récemment désigné un point focal pour la science ouverte

29. 2.4 In your country, is there a national implementation plan, strategy, policy or a roadmap for implementation of open science at the national level in line with the 2021 Recommendation? (ref.: (ii) 17.a, 17.b, 17.c, 17.f, 17.h)

- ☐ Yes
- ☐ Under development
- ☒ No

30. 2.4 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such policy instruments.

Le Ministère Le Ministère de l'enseignement supérieur de la recherche et de l'innovation technologique du Niger a été saisi récemment sur ces recommandations sur la science ouverte, et a récemment désigné un point focal pour la science ouverte

31. 2.5 In your country, are there policies and/or strategies that promote open science in line with the 2021 Recommendation at **institutional** level, including in the context of research-performing institutions, universities, scientific unions and associations and learned societies? (ref.: (ii) 17.d, 17.e, 17.g)

- ☐ Yes
- ☐ Under development
- ☒ No

32. 2.6 In your country, are there specific funding mechanisms[i] for open science at the national level? (ref.: (ii) 17.j, (iii) 18.j, (iv) 19.c)

[i] A funding mechanism refers to a policy instrument or process through which financial resources are allocated or provided for a specific purpose. Some examples are block funding, research grants, support for technological poles and centres of excellence, support for science parks and innovation centres, Infrastructure grants (for research facilities, labs, instruments), communication and outreach funds, innovation funds, loans and tax credits scholarships, studentships, fellowships, trust funds, sectoral funds.

- ☐ Yes
- ☐ Under development
- ☒ No

33. 2.6 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such funding mechanisms.

Le Ministère Le Ministère de l'enseignement supérieur de la recherche et de l'innovation technologique du Niger a été saisi récemment sur ces recommandations sur la science ouverte, et a récemment désigné un point focal pour la science ouverte

34. 2.7 1.1 In your country, have open science practices[i] been integrated in existing research funding mechanisms?

[i] Examples can include sharing open scientific knowledge (publications, research data, educational resources, software and hardware) with other scientists and with the public, sharing or using open infrastructures, collaboration with other researchers, with national and local societal actors such as policy makers, or sectors such as industry, agriculture, and health, and collaboration and open dialogue with indigenous peoples and local communities.

☐ Yes

☒ No

35. 2.7 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Le Ministère Le Ministère de l'enseignement supérieur de la recherche et de l'innovation technologique du Niger a été saisi récemment sur ces recommandations sur la science ouverte, et a récemment désigné un point focal pour la science ouverte

36. 2.8 Have efforts been made or are foreseen to be undertaken by end of 2025 in your country to foster equitable public-private partnerships on open science in line with the 2021 Recommendation? (ref.: (ii) 17.i)

☒ Yes

☐ No

37. 2.8 cont. **If yes**, please provide details and links as relevant.

38. 2.9 Is there a national monitoring framework for open science in your country? Or are there specific indicators on open science included in the national monitoring and evaluation framework for STI policy (ref.: (ii) 17.j, 23.c)

☐ Yes

☐ Under development

☒ No

Part 3. INVESTING IN OPEN SCIENCE INFRASTRUCTURES AND SERVICES

39. 3.1 What is the latest official data for your country's percentage of national gross domestic product (GDP) dedicated to research and development expenditure? Please also indicate the year of publication of this data, and to which year(s) it refers. (ref.: (iii) 18.a)

Non disponible

40. 3.2 What is the latest official data for the percentage of your country's population that have access to reliable internet and bandwidth? Please also indicate the year of publication of this data, and to which year(s) it refers. (ref.: (iii) 18.b)

Non disponible

41. 3.3 Are there national research and education networks (NRENs)[i] active in the country? (ref.: (iii) 18.c)

[i] A national research and education network (NREN) is a specialised internet service provider dedicated to supporting the needs of the research and education communities within a country.

☒ Yes

☐ No

42. 3.3 cont. **If yes**, please provide more information and links as relevant, and indicate to which open science actors in your country those networks are accessible.

l'ANSI qui est l'Agence Nationale de la Société de l'Information facilite l'accès a l'internet aux communautés

43. 3.4 Are there national or institutional open science infrastructures[i] in your country? (ref.: (iii) 18.d, 18.e, 18.k, 18.l, 18.m)

[i] Some examples of open science infrastructures include major shared scientific equipment or sets of instruments, open computational and data manipulation service infrastructures that enable collaborative and multidisciplinary data analysis, open science platforms and repositories for publications, research data and source codes, archives, open bibliometrics and scientometrics systems for assessing and analysing scientific domains, open laboratories, software forges and virtual research environments, open innovation testbeds, incubators, science museums, science parks and infrastructure for non-digital materials.

- ☐ Yes
- ☐ Under development
- ☒ No

44. 3.4 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Nos universités ne dispose de telles infrastructures. Peut être dans le cadre de la Science Ouverte nos universités seraient équipées de telles infrastructures

45. 3.5 Does your country host or fund any federated regional or international information technology infrastructure for open science? (ref.: (iii) 18.e, 18.f)

- ☐ Yes
- ☒ No

46. 3.5. cont. **If no**, are the existing open science infrastructures at regional and international levels accessible to all the relevant open science actors from your country?

☐ Yes

☒ No

☐ Other

47. 3.6 Is your country involved in any North-South, North-South-South and South-South collaborations to optimize infrastructure use and joint strategies for shared, multinational, regional and national open science platforms? (ref.: (iii) 18.g)

☐ Yes

☒ No

Part 4. INVESTING IN HUMAN RESOURCES, TRAINING, EDUCATION, DIGITAL LITERACY

AND CAPACITY BUILDING FOR OPEN SCIENCE

48. 4.1 Has systematic capacity building on open science taken place in higher education and/or research performing institutions in your country? (ref.: (iv) 19.a, 19.c)

☐ Yes

☒ No

49. 4.1 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Le point focal de la Science ouverte à été désigné récemment. On attend vivement le debut de ces formations surtout pour le point focal pour pouvoir etre bien outillé sur la science ouverte

50. 4.2 Have capacity building programmes for policy makers on how to integrate core values and principles of open science in STI policies and strategies taken place in your country?

☐ Yes

☒ No

51. 4.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Ce programme n'a pas encore débuté. On attend incessamment le debut de ces formations

52. 4.3 Has a framework of open science competencies been incorporated into higher education research skills curricula in your country, or is it foreseen by the end of 2025? (ref.: (iv) 19.b)

☐ Yes

☒ No

53. 4.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Les recommandations sur la science ouverte n'est pas encore opérationnelle

54. 4.4 Are open educational resources[i] as defined in the 2019 Recommendation on Open Educational Resources, used as an instrument for open science capacity building in your country in line with the 2019 Recommendation mentioned above? (ref.: (iv) 19.d)

[i] Open Educational Resources are learning, teaching and research materials in any format and medium that reside in the public domain or are under copyright that have been released under an open license, that permit no-cost access, re-use, re-purpose, adaptation and redistribution by others (2019 Recommendation on Open Educational Resources)

☐ Yes

☐ Partly

☒ No

55. 4.5 Have there been any initiatives in your country to support science communication in line with open science value and principles with a view to the dissemination of scientific knowledge to researchers of different disciplines, decision-makers and the public at large? (ref.: (iv) 19.e)

☒ Yes

☐ No

56. 4.5 cont. **If yes**, please provide more information and links as relevant.

Part 5. FOSTERING A CULTURE OF OPEN SCIENCE AND ALIGNING INCENTIVES FOR OPEN SCIENCE

57. 5.1 Have there been any initiatives at the national or institutional level, e.g. by universities and/or research performing institutions, to review the existing research assessment and evaluation processes in order to align them with open science principles and values or are they foreseen by the end of 2025? (ref.: (v) 20.b, 20c, 20i)

☐ Yes

☒ No

58. 5.1 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Le point focal de la Science ouverte à été désigné récemment. l'opérationnalisation des recommandation de la science ouverte n'est pas effective

59. 5.2 Have specific clauses that recognize open science practices, including sharing, collaborating and engaging with other researchers and societal actors beyond the scientific community, or dialogue with other knowledge systems, been incorporated in the career evaluation and progression systems or are foreseen by the end of 2025? (ref.: (v) 20.a, 20.c, 20.d)

☐ Yes

☒ No

60. 5.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Le point focal de la Science ouverte à été désigné récemment. l'opérationnalisation des recommandation de la science ouverte n'est pas effective

61. 5.3 Have there been any initiatives in your country to recognize and reward open science practices or are they foreseen by the end of 2025? (ref.: (v) 20.a, 20.b, 20.c, 20.e, 20.f, 20.g, 20h)

☐ Yes

☒ No

62. 5.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Le point focal de la Science ouverte à été désigné récemment. l'opérationnalisation des recommandation de la science ouverte n'est pas effective

63. 5.4 Have there been any unintended negative consequences[i] of open science practices reported in your country? (ref.: (v) 20)

[i] For example, predatory behaviours, data migration, exploitation and privatization of research data, increased costs for scientists and high article processing charges associated with certain business models in scientific publishing that may be causes of inequality for the scientific communities around the world and, in some cases, the loss of intellectual property and knowledge.

☐ Yes

☒ No

Part 6. PROMOTING INNOVATIVE APPROACHES FOR OPEN SCIENCE AT DIFFERENT STAGES

OF THE SCIENTIFIC PROCESS

64. 6.1 Have there been any initiatives at the national or institutional level that promote innovative, participatory methodological or procedural changes at different stages of the research cycle to increase the openness of the entire scientific process? (ref.: (vi) 21)

- ☐ YES, at the national level
- ☐ YES, at the institutional level
- ☒ YES, at both the national and institutional levels
- ☐ No

65. 6.1 cont. **If yes**, please indicate which of the recommended actions they address:

- ☒ promotion of pre-prints
- ☒ exploration of open peer-review practices
- ☐ valuing and sharing of negative scientific results and associated data
- ☒ participatory methods that value inputs from societal actors, e.g. citizen science, crowdsourcing scientific projects
- ☒ development of participatory strategies for identifying the needs of marginalized communities and highlighting socially relevant issues to be incorporated into research agendas
- ☒ promoting open innovation practices
- ☐ Other

66. 6.1. cont. **If yes**, please provide more information and links as relevant

Au Niger nous avons fait un atelier d'identification des besoins nationaux en recherche qui a pu identifier les thematiques de recherches sur les quelles la recherche doit se focaliser dans le but répondre aux problèmes de société. Ces différentes thématiques sont circonscrit dans quatre différents pole thématiques.

Part 7. PROMOTING INTERNATIONAL AND MULTI-STAKEHOLDER COOPERATION IN THE CONTEXT

OF OPEN SCIENCE AND WITH VIEW TO REDUCING DIGITAL, TECHNOLOGICAL AND KNOWLEDGE GAPS

67. 7.1 How is your country promoting and facilitating international scientific collaborations on open science as outlined in the 2021 Recommendation on Open Science? (ref.: (vii) 22.a)

Notre pays promeut la collaboration scientifique à travers les réseaux de collaboration créer par les enseignants chercheurs et chercheurs des différents centres de formation (Universités) et institutions de recherche avec les collègue de sous régions et de par le monde

68. 7.2 Does your country have a strategy or a plan for stimulating cross-border multi-stakeholder collaboration on open science, including with regards to exchange of best practices, capacity building and metrics for open science? (ref.: (vii) 22.b, 22.e, 22.f)

☐ Yes

☒ No

69. 7.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

C'est en cours

70. 7.3 Is your country involved in any discussion on the establishment of regional and international funding mechanisms for open science? (ref.: (vii) 22.c)

☐ Yes

☒ No

71. 7.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Le point focal de la Science ouverte à été désigné récemment. l'opérationnalisation des recommandation de la science ouverte n'est pas effective

Part 8. GENERAL CONSIDERATIONS

72. 8.1 Are there any specific external causes that may impede the implementation of the 2021 UNESCO Recommendation on Open Science in your country?

☐ Yes

☒ No

73. ANY OTHER COMMENTS: If you wish, you may enter any additional comments or information here. You may also contact openscience@unesco.org

Le Niger vient de désigné sont point focal pour la science ouverte, il serait nécessaire que ce dernier benefice des formations de mise à niveau pour etre bien au meme niveau d'information et de connaissance sur la science ouverte et puisse valablement faire la promotion des recommandations de l'UNESCO sur la science ouverte. Il a été difficile de reseigné ce present rapport du fait du manque d'informations sur la science ouverte et du contenu des recommandations de l' UNESCO. Nous recommandons a ce que le Niger soit pleinement associé dans toutes les activités de la science ouverte sur le plan national, régional et international.
