Time to complete

A. General information about the respondent

1. * Country

Cyprus

2. * Name of organization(s) or entity(s) responsible for the preparation of the report

Deputy Ministry of Research, Innovation and Digital Policy

3. * Website of organization(s) or entity(s) responsible for the preparation of the report

<https://www.gov.cy/dmrid>

4. * Email address of organization(s) or entity(s) responsible for the preparation of the report

5. Phone number of organization(s) or entity(s) responsible for the preparation of the report

6. Please describe the role/mandate of your organization

The Deputy Ministry of Research, Innovation, and Digital Policy (DMRID) was established in March 2020, with a threefold mandate:

- Design and Implementation of National Digital Policy and Strategy
- Design, Coordination, and Implementation of the National Policy and Strategy for Research & Innovation
- Design and Implementation of an Integrated Cybersecurity Strategic Policy Framework

Directorate for Research and Innovation

The Directorate for Research & Innovation (R&I) is responsible for the development and promotion of the National Strategy for R&I. Furthermore, it formulates and promotes policy measures to support the R&I ecosystem and to create the appropriate framework for the development of innovation and the strengthening of innovative entrepreneurship. Additionally, the Directorate for R&I participates in European policy-making, representing the Republic of Cyprus in EU institutions and advisory committees. At the same time, it supports the proper operation of the R&I governance system and provides funding to ensure the development and functioning of the R&I ecosystem.

The Deputy Ministry of Research, Innovation and Digital Policy, within the framework of the responsibilities of the Directorate for Research and Innovation, formulates the National Policy on Open Science in Cyprus, promotes actions for its implementation, monitors the development and progress of the issue and participates in the relevant committees at European level (European Open Science Could Steering Board, National Reference points for Open Science, European Research Area - Action for Open Science, national contact point for UNESCO OS 2021 Recommendation).

7. * Full name of officially designated contact person(s) who completed this survey

Lina Tsoumpanou

8. * Position of officially designated contact person(s) who completed this survey

Scientific Officer, Directorate for Research and Innovation (DMRID)

9. * Email address of officially designated contact person(s) who completed this survey

10. Full Name(s) of designated official(s) certifying the report

Christos Aspris (Senior Officer), Maria Pantelidou (Senior Officer), Directorate for Research and Innovation (DMRID)

11. Brief description of the consultation process established for the preparation of the report

On the initiative of the Deputy Ministry of Research, Innovation and Digital Policy, the National Policy for Open Science Practices was adopted in May 2022, covering:

- ✓ Open Access to scientific publications,
- ✓ the management of research data, including Open Access,
- ✓ the use of infrastructure, tools and services for Open Science; and
- ✓ the adoption of other Open Science practices.

With the adoption of the National Policy, an Action Plan has been developed to enable the development of the conditions required to enable the gradual transition of Cyprus to Open Science status. As part of the implementation of the Action Plan, the activity of monitoring progress through the conduct of an annual mapping exercise is being carried out.

In that context, a questionnaire is being prepared every year and stakeholders in the Research and Innovation ecosystem (academic institutions (public and private), publicly funded research organisations and research infrastructures, R&D funding bodies), in total around 50 stakeholders are invited to respond. The results of this mapping exercise are also used to feed in the yearly EOSC (European Open Science Cloud) mapping.

The responses in this Questionnaire are based on the 2024 mapping done by the DMRID.

12. * Name of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey

UCLan Cyprus / CYENS / CMMI Cyprus Marine and Maritime Institute / Frederick University / State Laboratory / University of Cyprus / Philips University / Institute of Neurology and Genetics / European University of Cyprus / Open University of Cyprus / The Cyprus Institute / University of Cyprus | PHAETHON CoE / University of Nicosia – UNIC / KIOS CoE -University of Cyprus / Cyprus University of Technology / Cyprus Research and Academic Network / Biobank CoE -University of Cyprus/ Agricultural Research Institute / Neapolis University Pafos / ERATOSTHENES Centre of Excellence

13. * Website of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey (Please use commas to separate multiple links, as: link A, link B)

<https://www.uclancyprus.ac.cy>, <https://cyens.org.cy>, <https://www.cmmi.blue>,

B. QUESTIONNAIRE FOR MEMBER STATES' REPORTING

ON THE IMPLEMENTATION OF THE 2021 RECOMMENDATION ON OPEN SCIENCE

Part 1. PROMOTING A COMMON UNDERSTANDING OF OPEN SCIENCE,

ASSOCIATED BENEFITS AND CHALLENGES, AS WELL AS DIVERSE PATHS TO OPEN
SCIENCE

16. 1.1 Has the 2021 UNESCO Recommendation on Open Science been promoted and/or shared with appropriate ministries and institutions as well as affiliated organizations in your country?

☒ Yes

☐ No

17. 1.1 cont. **If yes**, please indicate which ministries and or national authorities/entities have been involved in the promotion of the 2021 Recommendation.

The Ministry of Education, Sport and Youth

18. 1.2 Is the 2021 Recommendation on Open Science available in the national language(s) of your country?

☒ Yes

☐ No

19. 1.2 cont. **If yes**, which language(s)?

20. 1.3 Have there been awareness raising activities on open science, including all its key elements[i], associated benefits and challenges, organized or foreseen to be organized by the end of 2025 in your country by national authorities or entities? (ref.: (i) 16.f, 16.g, 16.h)

[i] Please refer to the elements of open science defined in the 2021 Recommendation, namely : open scientific knowledge (including open access to scientific publications, research data, open educational resources, open-source software and code, open hardware), open science infrastructures, open engagement of societal actors and open dialogue with other knowledge systems.

☒ Yes

☐ No

21. 1.3 cont. **If yes**, please provide details on the activities organized or foreseen and links as relevant.

The Cyprus National Policy for Open Science Practices delegates the responsibility for the skills and training actions to Libraries. As part of the collaboration between the Greek and Cyprus OpenAIRE NOADs, the University of Cyprus Library organises regular webinar series covering a variety of OS aspects including legal topics, services, infrastructure, policies, citizen science, DMPs etc. The main goal of these training sessions is to fill any potential knowledge gaps of any type of stakeholders including researchers, policymakers, funders, librarians, and citizens/ general public audience that are interested in the topic. The webinars are always open to the public. A significant amount of training material and recordings was created in Greek and are openly available and easily accessible through the UCY Library Institutional Repository GNOSIS.

<https://gnosis.library.ucy.ac.cy/>. In addition, since 2009 the University of Cyprus Library is participating in European projects and acting as the only National Open Access Desk (NOAD) of OpenAIRE in the country and is actively involved to the promotion and transmission of knowledge regarding Open Science aspects. Since then, every year the University of Cyprus Library is organising numerous webinars and conferences or other face to face events to raise awareness and provide the necessary Open Science knowledge to different stakeholders. The case of the UCY Library has been included as a use case in the Brochure of Use Cases on EOSC and Open Science <https://zenodo.org/records/10822698> Additional material:

<https://yerun.eu/2023/10/advocating-open-science-through-educational-actions/>

22. 1.4 Have specific actions been undertaken or are planned to be undertaken by end of 2025 in your country to incorporate the values and principles of open science[i], in publicly funded research? (ref.: (i) 16.a, 16.b, 16.c, 16.d, 16.e, 16.h)

[i] The 2021 Recommendation outlines a set of shared values of open science stemming from the rights-based, ethical, epistemological, economic, legal, political, social, multi-stakeholder and technological implications of opening science to society and broadening the principles of openness to the whole cycle of scientific research. It also provides a set of guiding principles, as a framework for enabling conditions and practices, which uphold the values of open science and can realize the ideals of open science.

Please see the values of open science, namely quality and integrity, collective benefit, equity and fairness, and diversity and inclusiveness.

Please see the guiding principles for open science ,namely transparency, scrutiny, critique and reproducibility; equality of opportunities; responsibility, respect and accountability; collaboration, participation and inclusion; flexibility and sustainability.

☒ Yes

☐ No

23. 1.4 cont. If **yes**, please indicate the actions that are taken to incorporate the specific values and principles. For each case, please provide details and links as relevant.

National R&I funding programmes 2023-2027 include obligation for OA to publications and Open Research Data

Part 2. DEVELOPING AN ENABLING POLICY ENVIRONMENT FOR OPEN SCIENCE

24. 2.1 Does your country have a national policy[i], strategy or plan of action on science, technology and innovation (STI)?

[i] National STI policy is most commonly a governmental document developed by governing bodies leading the STI policy design and implementation in a given country, which formulates objectives and guides actions and decision-making processes in the area of STI on the national level.

☒ Yes

☐ No

25. 2.1 cont. **If yes**

· please share a machine-readable PDF file of the policy using this link: <https://tinyurl.com/27p5zct8> designating openscience@unesco.org as the recipient, and provide the following information: *Title of the policy, the authority in charge of development of the policy, entities involved and the process of development, year of adoption, year of last update, key areas/sections of the policy, and links to the webpage if available.*

In the comment box, please indicate the question number for this attachment / document.

After uploading, please return to this page to continue the survey.

26. 2.1 cont. **If yes:**

- does it include any of the following open science elements:

- ☒ open access to scientific knowledge
- ☒ open science infrastructure
- ☐ open engagement of societal actors
- ☐ open dialogue with other knowledge systems

27. 2.2 In your country, is there a policy, or a set of policies and/or legal framework(s)[i] at the national level that address open science or any of its key elements in line with the definition, values and principles outlined in the 2021 Recommendation on Open Science? (*ref.: (i) 16.a, 16.b, 16.c, 16.d, 16.e, 16.h*)

[i] These can include specific national policies, sets of guidelines, rules, regulations, laws, principles, or directions to govern open science practices.

- ☒ Yes
- ☐ Partly
- ☐ No

28. 2.2 cont. **If yes or partly**, please share a machine-readable PDF file(s) of the policy(ies) using this link: <https://tinyurl.com/27p5zct8> designating openscience@unesco.org as the recipient, and provide the following information for each: *Title of the policy or legal instrument, the authority in charge of development of the policy, entities involved and the process of development, year of adoption, year of last update, key areas/sections of the policy, elements of open science that are addressed, and links to the webpage(s) if available.*

29. 2.3 In your country, are there specific policy instruments^[i] that aim to promote open science?

[i] Policy instruments include programmes, methods and mechanisms of technical and operational nature, required to solve the issues set by the policy, with focus on the target beneficiaries, resources, indicators, and set of goals for delivering products (short term), results (medium-term), and impacts (long term).

- ☐ Yes
- ☐ Under development
- ☒ No

30. 2.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such policy instruments.

lack of resources

31. 2.4 In your country, is there a national implementation plan, strategy, policy or a roadmap for implementation of open science at the national level in line with the 2021 Recommendation? (ref.: (ii) 17.a, 17.b, 17.c, 17.f, 17.h)

- ☒ Yes
- ☐ Under development
- ☐ No

32. 2.4 cont. **If yes or under development**, please provide details and links as relevant, including the name of ministries and national authorities/entities, as well as affiliated organizations that are involved in the development and implementation of the plan, strategy or the roadmap.

As mentioned above, OS is part of the National Strategy for R&I 2024-2026. Also a National OS Initiative is being implemented since 2021 by the Ministry of Research , Innovation and Digital Policy in collaboration with the Ad Hoc National Open Science Committee.

33. 2.5 In your country, are there policies and/or strategies that promote open science in line with the 2021 Recommendation at **institutional** level, including in the context of research-performing institutions, universities, scientific unions and associations and learned societies? (ref.: (ii) 17.d, 17.e, 17.g)

- ☒ Yes
- ☐ Under development
- ☐ No

34. 2.5 cont. **If yes**, please provide more information, including the number of policies, name of the institute(s) that has/have developed the policy(s) and elements of open science included in the policy (please consider policies and strategies addressing all elements of open science, including citizen and participatory science, or co-production of knowledge with multiple actors). To view the elements of open science, see: <https://unesdoc.unesco.org/ark:/48223/pf0000379949/PDF/379949eng.pdf.multi.nameddest=20/p.nameddest=20/.page=9>

UCLan Cyprus Yes, voluntary CYENS Yes mandatory, CMMI Cyprus Marine and Maritime Institute YES mandatory, Frederick University Under development, STATE LABORATORY NO, UCY Yes voluntary, Philips University Under development, CING Yes mandatory, EUC Under development, OUC Yes mandatory, The Cyprus Institute Under development, University of Cyprus | PHAETHON CoE Yes mandatory, University of Nicosia – UNIC Under development, KIOS Yes mandatory, CUT Under development, CYPRIOT RESEARCH AND ACADEMIC NETWORK Under development, Institute of Agricultural Research NO, Neapolis University Pafos Yes voluntary, ERATOSTHENES Centre of Excellence Yes mandatory

35. 2.6 In your country, are there specific funding mechanisms[i] for open science at the national level? (ref.: (ii) 17.j, (iii) 18.j, (iv) 19.c)

[i] A funding mechanism refers to a policy instrument or process through which financial resources are allocated or provided for a specific purpose. Some examples are block funding, research grants, support for technological poles and centres of excellence, support for science parks and innovation centres, Infrastructure grants (for research facilities, labs, instruments), communication and outreach funds, innovation funds, loans and tax credits scholarships, studentships, fellowships, trust funds, sectoral funds.

- ☒ Yes
- ☐ Under development
- ☐ No

36. 2.6 cont. **If yes or under development**, please provide details and links as relevant.

OS costs (for publications) are eligible costs under the national research funding schemes.

37. 2.7 1.1 In your country, have open science practices[i] been integrated in existing research funding mechanisms?

[i] Examples can include sharing open scientific knowledge (publications, research data, educational resources, software and hardware) with other scientists and with the public, sharing or using open infrastructures, collaboration with other researchers, with national and local societal actors such as policy makers, or sectors such as industry, agriculture, and health, and collaboration and open dialogue with indigenous peoples and local communities.

☐ Yes

☒ No

38. 2.7 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

39. 2.8 Have efforts been made or are foreseen to be undertaken by end of 2025 in your country to foster equitable public-private partnerships on open science in line with the 2021 Recommendation? (ref.: (ii) 17.i)

☐ Yes

☒ No

40. 2.8 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

41. 2.9 Is there a national monitoring framework for open science in your country? Or are there specific indicators on open science included in the national monitoring and evaluation framework for STI policy (ref.: (ii) 17.j, 23.c)

- ☒ Yes
- ☐ Under development
- ☐ No

42. 2.9 cont. **If yes or under development**, please provide details and links as relevant.

monitoring of the progress of the OS National Policy, through the conduct of an annual mapping exercise by the Deputy Ministry of Research, innovation and Digital Policy

Part 3. INVESTING IN OPEN SCIENCE INFRASTRUCTURES AND SERVICES

43. 3.1 What is the latest official data for your country's percentage of national gross domestic product (GDP) dedicated to research and development expenditure? Please also indicate the year of publication of this data, and to which year(s) it refers. (ref.: (iii) 18.a)

2022: 0.89 of GDP

44. 3.2 What is the latest official data for the percentage of your country's population that have access to reliable internet and bandwidth? Please also indicate the year of publication of this data, and to which year(s) it refers. (ref.: (iii) 18.b)

Cyprus - Level of internet access was 94.92% in December of 2024, according to the EUROSTAT. Also check: <https://datareportal.com/reports/digital-2024-cyprus>

45. 3.3 Are there national research and education networks (NRENs)[i] active in the country? (ref.: (iii) 18.c)

[i] A national research and education network (NREN) is a specialised internet service provider dedicated to supporting the needs of the research and education communities within a country.

☒ Yes

☐ No

46. 3.3 cont. **If yes**, please provide more information and links as relevant, and indicate to which open science actors in your country those networks are accessible.

CYPRLOT RESEARCH AND ACADEMIC NETWORK, <https://cynet.ac.cy/contact/>

47. 3.4 Are there national or institutional open science infrastructures[i] in your country? (ref.: (iii) 18.d, 18.e, 18.k, 18.l, 18.m)

[i] Some examples of open science infrastructures include major shared scientific equipment or sets of instruments, open computational and data manipulation service infrastructures that enable collaborative and multidisciplinary data analysis, open science platforms and repositories for publications, research data and source codes, archives, open bibliometrics and scientometrics systems for assessing and analysing scientific domains, open laboratories, software forges and virtual research environments, open innovation testbeds, incubators, science museums, science parks and infrastructure for non-digital materials.

- ☐ Yes
- ☒ Under development
- ☐ No

48. 3.4 cont. **If yes or under development**, please indicate which type(s) of infrastructure:

- ☒ federated information technology infrastructure for open science, including high-performance computing, cloud computing and data storage
- ☐ community managed infrastructures, protocols and standards, for example those that support bibliodiversity and engagement with society
- ☐ platforms for exchanges and co-creation of knowledge between scientists and society
- ☐ community-based monitoring and information systems to complement national, regional and global data and information systems

49. 3.4 cont. **If yes or under development**, for each infrastructure, please provide links as relevant and more information with regard to their compliance with the 2021 Recommendation on Open Science in terms of inclusivity, accessibility, interoperability, community governance, FAIR (Findable, Accessible, Interoperable, and Reusable) and CARE (Collective Benefit, Authority to Control, Responsibility and Ethics) principles. Please indicate if the infrastructure is non-commercial.

There are several institutional research data repositories, however they are mainly hosting publication outputs and only few provide services for other open access material such as data sets and open-source software. The situation is better with institutional digital storage systems that are mainly used to store and provide internal access to the institution's publication outputs or the institution's section. The Deputy Ministry of Research, Innovation and Digital Policy has initiated actions for the creation of a national infrastructure / repository which are expected to be further implemented within the next 2 years. This project promotes the creation of a national scale repository, a project that is expected to be completed within the next two years.

50. 3.5 Does your country host or fund any federated regional or international information technology infrastructure for open science? (ref.: (iii) 18.e, 18.f)

☐ Yes

☒ No

51. 3.5. cont. **If no**, are the existing open science infrastructures at regional and international levels accessible to all the relevant open science actors from your country?

☒ Yes

☐ No

☐ Other

52. 3.6 Is your country involved in any North-South, North-South-South and South-South collaborations to optimize infrastructure use and joint strategies for shared, multinational, regional and national open science platforms? (ref.: (iii) 18.g)

☐ Yes

☒ No

Part 4. INVESTING IN HUMAN RESOURCES, TRAINING, EDUCATION, DIGITAL LITERACY

AND CAPACITY BUILDING FOR OPEN SCIENCE

53. 4.1 Has systematic capacity building on open science taken place in higher education and/or research performing institutions in your country? (ref.: (iv) 19.a, 19.c)

☐ Yes

☒ No

54. 4.1 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

The National OS Policy encourages the research stakeholders to embed OS practices recruitment, research assessment and evaluation criteria and promotes the adoption of incentives and rewards of researchers who use OS practices. A systemic approach is far beyond the current situation in most of the academic and research performing institutions in the country. However, there are collaborations with public libraries for the promotion of Citizen Science initiatives and funding mechanisms such as "Cyprus University of Technology Open Access Author Fund". In addition, the libraries in Cyprus participate in the Consortium and Cyprus Association of Librarians – Information Scientists - CALIS for Open Science, supervised by the Deputy Ministry of Research, Innovation, and Digital Policy of Cyprus.

55. 4.2 Have capacity building programmes for policy makers on how to integrate core values and principles of open science in STI policies and strategies taken place in your country?

☐ Yes

☒ No

56. 4.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

57. 4.3 Has a framework of open science competencies been incorporated into higher education research skills curricula in your country, or is it foreseen by the end of 2025? (ref.: (iv) 19.b)

☐ Yes

☒ No

58. 4.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Please refer to answer provided in question 54 (4.1)

59. 4.4 Are open educational resources[i] as defined in the 2019 Recommendation on Open Educational Resources, used as an instrument for open science capacity building in your country in line with the 2019 Recommendation mentioned above? (ref.: (iv) 19.d)

[i] Open Educational Resources are learning, teaching and research materials in any format and medium that reside in the public domain or are under copyright that have been released under an open license, that permit no-cost access, re-use, re-purpose, adaptation and redistribution by others (2019 Recommendation on Open Educational Resources)

- ☐ Yes
- ☒ Partly
- ☐ No

60. 4.5 Have there been any initiatives in your country to support science communication in line with open science value and principles with a view to the dissemination of scientific knowledge to researchers of different disciplines, decision-makers and the public at large? (ref.: (iv) 19.e)

- ☒ Yes
- ☐ No

61. 4.5 cont. **If yes**, please provide more information and links as relevant.

Initiatives mainly led by academic institutions e.g. University of Cyprus 'Citizen-Enhanced Open Science in Southeastern Europe Higher Education Knowledge Hubs' funded by HEU

Part 5. FOSTERING A CULTURE OF OPEN SCIENCE AND ALIGNING INCENTIVES FOR OPEN SCIENCE

62. 5.1 Have there been any initiatives at the national or institutional level, e.g. by universities and/or research performing institutions, to review the existing research assessment and evaluation processes in order to align them with open science principles and values or are they foreseen by the end of 2025? (ref.: (v) 20.b, 20c, 20i)

☒ Yes

☐ No

63. 5.1 cont. **If yes**, please provide more information and links as relevant.

In the context of the COARA initiative, national academic institutions are doing efforts to persuade researchers to practice Open Science.

64. 5.2 Have specific clauses that recognize open science practices, including sharing, collaborating and engaging with other researchers and societal actors beyond the scientific community, or dialogue with other knowledge systems, been incorporated in the career evaluation and progression systems or are foreseen by the end of 2025? (ref.: (v) 20.a, 20.c, 20.d)

☐ Yes

☒ No

65. 5.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Under development in several institutional policies

66. 5.3 Have there been any initiatives in your country to recognize and reward open science practices or are they foreseen by the end of 2025? (ref.: (v) 20.a, 20.b, 20.c, 20.e, 20.f, 20.g, 20h)

☐

Yes

☒

No

67. 5.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

lack of funding

68. 5.4 Have there been any unintended negative consequences[i] of open science practices reported in your country? (ref.: (v) 20)

[i] For example, predatory behaviours, data migration, exploitation and privatization of research data, increased costs for scientists and high article processing charges associated with certain business models in scientific publishing that may be causes of inequality for the scientific communities around the world and, in some cases, the loss of intellectual property and knowledge.

☐

Yes

☒

No

Part 6. PROMOTING INNOVATIVE APPROACHES FOR OPEN SCIENCE AT DIFFERENT STAGES OF THE SCIENTIFIC PROCESS

69. 6.1 Have there been any initiatives at the national or institutional level that promote innovative, participatory methodological or procedural changes at different stages of the research cycle to increase the openness of the entire scientific process? (ref.: (vi) 21)

- ☐ YES, at the national level
- ☐ YES, at the institutional level
- ☐ YES, at both the national and institutional levels
- ☒ No

70. 6.1 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Part 7. PROMOTING INTERNATIONAL AND MULTI-STAKEHOLDER COOPERATION IN THE CONTEXT

OF OPEN SCIENCE AND WITH VIEW TO REDUCING DIGITAL, TECHNOLOGICAL AND KNOWLEDGE GAPS

71. 7.1 How is your country promoting and facilitating international scientific collaborations on open science as outlined in the 2021 Recommendation on Open Science? (ref.: (vii) 22.a)

CY as an EU member state participates in EU initiatives for OS such as the European Open Science Cloud and the ERA (European Research Area) OS Action

72. 7.2 Does your country have a strategy or a plan for stimulating cross-border multi-stakeholder collaboration on open science, including with regards to exchange of best practices, capacity building and metrics for open science? (ref.: (vii) 22.b, 22.e, 22.f)

☐ Yes

☒ No

73. 7.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Only, as part of EU relevant actions/initiatives

74. 7.3 Is your country involved in any discussion on the establishment of regional and international funding mechanisms for open science? (ref.: (vii) 22.c)

☒ Yes

☐ No

75. 7.3 cont. **If yes**, please provide links as relevant and more information.

EOSC

Part 8. GENERAL CONSIDERATIONS

76. 8.1 Are there any specific external causes that may impede the implementation of the 2021 UNESCO Recommendation on Open Science in your country?

☐ Yes

☒ No

77. ANY OTHER COMMENTS: If you wish, you may enter any additional comments or information here. You may also contact openscience@unesco.org
