Time to complete

A. General information about the respondent

1. * Country

Ukraine

2. * Name of organization(s) or entity(s) responsible for the preparation of the report

Ministry of Education and Science of Ukraine (MES)

3. * Website of organization(s) or entity(s) responsible for the preparation of the report

mon.gov.ua

4. * Email address of organization(s) or entity(s) responsible for the preparation of the report

5. Phone number of organization(s) or entity(s) responsible for the preparation of the report

6. Please describe the role/mandate of your organization

The main function of MES is the formation and implementation of the state policy in the field of education and science. The Ministry also directs scientific, technology and innovative activities, transfer of technologies as well as provides state supervision over the activities of especially educational institutions of all forms of ownership together with enterprises, institutions and organizations that provide educational services or act as third-party suppliers in those services provisioning.

7. * Full name of officially designated contact person(s) who completed this survey

Olha Prudka

8. * Position of officially designated contact person(s) who completed this survey

Head of Expert Group

9. * Email address of officially designated contact person(s) who completed this survey

10. Full Name(s) of designated official(s) certifying the report

Deputy Minister of Education and Science of Ukraine Denys Kurbatov

11. Brief description of the consultation process established for the preparation of the report

This report is made mainly basing on the reports of the implementation of National Plan for Open Science in Ukraine.

12. * Name of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey

National research foundation of Ukraine

13. * Website of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey
(Please use commas to separate multiple links, as: link A, link B)

nrfu.org.ua

14. * Email address of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey

15. Sector of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey

B. QUESTIONNAIRE FOR MEMBER STATES' REPORTING

ON THE IMPLEMENTATION OF THE 2021 RECOMMENDATION ON OPEN
SCIENCE

Part 1. PROMOTING A COMMON UNDERSTANDING OF OPEN SCIENCE,

ASSOCIATED BENEFITS AND CHALLENGES, AS WELL AS DIVERSE PATHS TO
OPEN SCIENCE

16. 1.1 Has the 2021 UNESCO Recommendation on Open Science been promoted and/or shared with appropriate ministries and institutions as well as affiliated organizations in your country?

☒ Yes

☐ No

17. 1.1 cont. **If yes**, please indicate which ministries and or national authorities/entities have been involved in the promotion of the 2021 Recommendation.

Ukraine has adopted a National Plan for Open Science, aligning with the principles of the 2021 UNESCO Recommendation. The Ministry of Education and Science of Ukraine (MoES) oversees the implementation of these policies.

18. 1.2 Is the 2021 Recommendation on Open Science available in the national language(s) of your country?

☐ Yes

☒ No

19. 1.3 Have there been awareness raising activities on open science, including all its key elements[i], associated benefits and challenges, organized or foreseen to be organized by the end of 2025 in your country by national authorities or entities? (ref.: (i) 16.f, 16.g, 16.h)

[i] Please refer to the elements of open science defined in the 2021 Recommendation, namely : open scientific knowledge (including open access to scientific publications, research data, open educational resources, open-source software and code, open hardware), open science infrastructures, open engagement of societal actors and open dialogue with other knowledge systems.

☒ Yes

☐ No

20. 1.3 cont. **If yes**, please provide details on the activities organized or foreseen and links as relevant.

Following events were organised. 1st seminar on forming a national consensus on open science within the Open4UA project <https://lpnu.ua/news/1-i-seminar-z-formuvannia-natsionalnoho-konsensusu-shchodo-vidkrytoi-nauky> Law and Open Science: the regulatory framework of Open Science and Open Science principles in legal research <https://lpnu.ua/news/panelna-dyskusiia-pravo-i-vidkryta-nauka-v-mezhakh-viii-kharkivskoho-mizhnarodnoho> 2nd seminar on forming a national consensus on open science within the Open4UA project <https://lpnu.ua/news/2-i-seminar-z-formuvannia-natsionalnoho-konsensusu-shchodo-vidkrytoi-nauky> FIRST INTERNATIONAL CONFERENCE "OPEN SCIENCE AND INNOVATION IN UKRAINE", 2022 OSICU2022 is an international scientific conference on open science and innovation in Ukraine (timed to coincide with the International Open Access Week), which will be held under the auspices of the Ministry of Education and Science of Ukraine and with the participation of national, international organizations, associations and other sponsors. The conference will be attended by leading experts from many countries of the world, who will share their experience, and ways to implement the best practices of open science and innovation in Ukraine will be discussed. The event includes reports by renowned international specialists and experts. The conference is timed to coincide with the International Open Access Week. <https://conference.dntb.gov.ua/portal/conference2022/> II International Conference "OPEN SCIENCE AND INNOVATION IN UKRAINE 2023" The conference is aimed at finding ways to solve the urgent problems of uninterrupted access to research infrastructure, free access to the results of scientific activity, the need to reform the system of scientific research evaluation and accelerate the integration of Ukrainian science into the European Research Area, by harmonizing the policies of the European Union in the field of open science and data exchange formats. <https://conference.dntb.gov.ua/portal/conference2023/> III International Conference "OPEN SCIENCE AND INNOVATION IN UKRAINE 2024" OSIU2024 is a forum designed to present and discuss works related to fundamental or specific aspects of open science and innovation. This forum discusses a wide range of issues - from the formation and implementation of policies, infrastructure and provision of services for the practical implementation of open science and innovation to the creation and support of the human factor to ensure their long-term development. <https://conference.dntb.gov.ua/portal/conference2024/>

21. 1.4 Have specific actions been undertaken or are planned to be undertaken by end of 2025 in your country to incorporate the values and principles of open science[i], in publicly funded research? (ref.: (i) 16.a, 16.b, 16.c, 16.d, 16.e, 16.h)

[i] The 2021 Recommendation outlines a set of shared values of open science stemming from the rights-based, ethical, epistemological, economic, legal, political, social, multi-stakeholder and technological implications of opening science to society and broadening the principles of openness to the whole cycle of scientific research. It also provides a set of guiding principles, as a framework for enabling conditions and practices, which uphold the values of open science and can realize the ideals of open science.

Please see the values of open science, namely quality and integrity, collective benefit, equity and fairness, and diversity and inclusiveness.

Please see the guiding principles for open science ,namely transparency, scrutiny, critique and reproducibility; equality of opportunities; responsibility, respect and accountability; collaboration, participation and inclusion; flexibility and sustainability.

☒ Yes

☐ No

22. 1.4 cont. If **yes**, please indicate the actions that are taken to incorporate the specific values and principles. For each case, please provide details and links as relevant.

IV International Conference "OPEN SCIENCE AND INNOVATION IN UKRAINE 2025" (October 2025)

Part 2. DEVELOPING AN ENABLING POLICY ENVIRONMENT FOR OPEN SCIENCE

23. 2.1 Does your country have a national policy[i], strategy or plan of action on science, technology and innovation (STI)?

[i] National STI policy is most commonly a governmental document developed by governing bodies leading the STI policy design and implementation in a given country, which formulates objectives and guides actions and decision-making processes in the area of STI on the national level.

☒ Yes

☐ No

24. 2.1 cont. **If yes**

· please share a machine-readable PDF file of the policy using this link: <https://tinyurl.com/27p5zct8> designating openscience@unesco.org as the recipient, and provide the following information: *Title of the policy, the authority in charge of development of the policy, entities involved and the process of development, year of adoption, year of last update, key areas/sections of the policy, and links to the webpage if available.*

In the comment box, please indicate the question number for this attachment / document.

After uploading, please return to this page to continue the survey.

Law of Ukraine "On Priority Areas of Development of Science and Technology" <https://zakon.rada.gov.ua/laws/show/2623-14#Text> Law of Ukraine "On Priority Areas of Innovation Activity in Ukraine" <https://zakon.rada.gov.ua/laws/show/3715-17#Text> The Strategic Action Plan of the MOES by 2027 <https://mon.gov.ua/strategichniy-plan-diyalnosti-mon-do-2027-roku> National Strategy for Open Science (approved in 2023). The Law of Ukraine "On Scientific and Scientific-Technical Activity" The Law of Ukraine "On Scientific-Technical Information" The Law of Ukraine "On Information" Order of the Cabinet of Ministers of Ukraine "On approval of the Strategy for the Digital Development of Innovative Activity of Ukraine for the period until 2030 and approval of the operational plan of measures for its implementation in 2025 - 2027" dated December 31, 2024 No. 1351-r

25. 2.1 cont. **If yes:**

- does it include any of the following open science elements:

- ☒ open access to scientific knowledge
- ☒ open science infrastructure
- ☒ open engagement of societal actors
- ☒ open dialogue with other knowledge systems

26. 2.2 In your country, is there a policy, or a set of policies and/or legal framework(s)[i] at the national level that address open science or any of its key elements in line with the definition, values and principles outlined in the 2021 Recommendation on Open Science? (*ref.: (i) 16.a, 16.b, 16.c, 16.d, 16.e, 16.h*)

[i] These can include specific national policies, sets of guidelines, rules, regulations, laws, principles, or directions to govern open science practices.

- ☐ Yes
- ☒ Partly
- ☐ No

27. 2.2 cont. **If yes or partly**, please share a machine-readable PDF file(s) of the policy(ies) using this link: <https://tinyurl.com/27p5zct8> designating openscience@unesco.org as the recipient, and provide the following information for each: *Title of the policy or legal instrument, the authority in charge of development of the policy, entities involved and the process of development, year of adoption, year of last update, key areas/sections of the policy, elements of open science that are addressed, and links to the webpage(s) if available.*

Draft Law on Amendments to the Law of Ukraine "On Scientific and Scientific-Technical Activities" regarding issues of research infrastructure and support for young scientists"
<https://itd.rada.gov.ua/billInfo/Bills/Card/43122> ; National Plan for Open Science
<https://zakon.rada.gov.ua/laws/show/892-2022-%D1%80#Text>

28. 2.3 In your country, are there specific policy instruments[i] that aim to promote open science?

[i] Policy instruments include programmes, methods and mechanisms of technical and operational nature, required to solve the issues set by the policy, with focus on the target beneficiaries, resources, indicators, and set of goals for delivering products (short term), results (medium-term), and impacts (long term).

- ☒ Yes
- ☐ Under development
- ☐ No

29. 2.3 cont. **If yes or under development**, please provide details and links as relevant, including for each instrument: *Title of the instrument, its objective, the authority in charge, allocated budget, elements of open science included.*

National Plan for Open Science: <https://mon.gov.ua/static-objects/mon/sites/1/nauka/2023/01/26/National-Open-Science-Plan-Ukraine.pdf> ; Open science in National academy of sciences of Ukraine <https://openscience.nas.gov.ua/open-science/open-science-at-the-nas-of-ukraine>

30. 2.4 In your country, is there a national implementation plan, strategy, policy or a roadmap for implementation of open science at the national level in line with the 2021 Recommendation? (ref.: (ii) 17.a, 17.b, 17.c, 17.f, 17.h)

- ☒ Yes
- ☐ Under development
- ☐ No

31. 2.4 cont. **If yes or under development**, please provide details and links as relevant, including the name of ministries and national authorities/entities, as well as affiliated organizations that are involved in the development and implementation of the plan, strategy or the roadmap.

There is a National Plan for Open Science <https://zakon.rada.gov.ua/laws/show/892-2022-%D1%80#n11>

32. 2.5 In your country, are there policies and/or strategies that promote open science in line with the 2021 Recommendation at **institutional** level, including in the context of research-performing institutions, universities, scientific unions and associations and learned societies? (ref.: (ii) 17.d, 17.e, 17.g)

- ☒ Yes
- ☐ Under development
- ☐ No

33. 2.5 cont. **If yes**, please provide more information, including the number of policies, name of the institute(s) that has/have developed the policy(s) and elements of open science included in the policy (please consider policies and strategies addressing all elements of open science, including citizen and participatory science, or co-production of knowledge with multiple actors).

To view the elements of open science,

see: <https://unesdoc.unesco.org/ark:/48223/pf0000379949/PDF/379949eng.pdf.multi.nameddest=20/p.nameddest=20/.page=9>

Open science in National academy of sciences of Ukraine

<https://openscience.nas.gov.ua/open-science/open-science-at-the-nas-of-ukraine> ; Open Practices, Transparency and Integrity for Modern Academia (OPTIMA): The main goal of the "Open Practices, Transparency and Integrity for Modern Academia" (OPTIMA) project is implementing Open Science practices in Ukraine to improve the quality of National higher education services. OPTIMA's priorities include engaging disadvantaged academic communities of displaced Ukrainian universities, focusing on climate change as well as inclusivity by means of modern information technologies. The OPTIMA consortium also includes Vasyl Stus Donetsk National University, Sumy State University, Lutsk National Technical University, National Antarctic Scientific Center and the National Agency for Higher Education Quality Assurance. Project's diverse international partners are Graz University of Technology (Austria), Wrocław University of Science and Technology (Poland), University of Côte d'Azur (France), the European Council of Doctoral Candidates and Junior Researchers (Eurodoc, Belgium), Stichting eIFL.net (Netherlands). Associated partners: Council of Rectors of Displaced Universities, Centre for Innovation and Sustainability for International Development and Antiplagiat Ltd - <https://lpnu.ua/en/optima> ; Open Science for Ukrainian Higher Education System (Open4UA): Open4UA aims to advance the growth of Ukraine's knowledge-driven economy for the post-war recovery by reforming the higher education system. This will be achieved through prioritising Open Science across different levels (from National policies to individual researchers), which is reflected in the project objectives: fostering the National reform on Open Science for the higher education system modernisation and EU integration by supporting legislation amendments based on the orchestrated National consensus; introducing existing advanced approaches and creating state-of-the-art recommendations and mechanisms to reform research assessment to prioritise Open Science at the National level during state certification of higher educational institutions and research projects evaluation; fostering the institutional reform on Open Science and advancing research assessment in higher educational institutions through developing and piloting related toolkits. - <https://lpnu.ua/en/open4ua>

34. 2.6 In your country, are there specific funding mechanisms[i] for open science at the national level? (ref.: (ii) 17.j, (iii) 18.j, (iv) 19.c)

[i] A funding mechanism refers to a policy instrument or process through which financial resources are allocated or provided for a specific purpose. Some examples are block funding, research grants, support for technological poles and centres of excellence, support for science parks and innovation centres, Infrastructure grants (for research facilities, labs, instruments), communication and outreach funds, innovation funds, loans and tax credits scholarships, studentships, fellowships, trust funds, sectoral funds.

☐

Yes

☐

Under development

☒

No

35. 2.6 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such funding mechanisms.

Budget financing options are limited due to the protracted war in the country.

36. 2.7 1.1 In your country, have open science practices[i] been integrated in existing research funding mechanisms?

[i] Examples can include sharing open scientific knowledge (publications, research data, educational resources, software and hardware) with other scientists and with the public, sharing or using open infrastructures, collaboration with other researchers, with national and local societal actors such as policy makers, or sectors such as industry, agriculture, and health, and collaboration and open dialogue with indigenous peoples and local communities.

☒ Yes

☐ No

37. 2.7 cont. **If yes**, please provide details and links as relevant.

The new methodology for state assessment of research institutions and higher education institutions in terms of conducting scientific activities includes indicators for open access publications, publication of preprints, publication of research datasets.
<https://zakon.rada.gov.ua/laws/show/z1743-24#Text> The National Research Foundation of Ukraine has developed an action plan to support CoARA <https://nrfu.org.ua/information-resources/vidkryta-nauka/> The competitive selection of projects by the Ministry of Education and Science takes into account open science indicators for open access to publications and research data
https://nauka.gov.ua/docs/91/%D0%9D%D0%B0%D0%BA%D0%B0%D0%B7_%D0%9C%D0%9E%D0%9D_%D0%B2%D1%96%D0%B4_24_%D0%B2%D0%B5%D1%80%D0%B5%D1%81%D0%BD%D1%8F_2024_%D1%80%D0%BA%D0%BE%D1%83_1361.PDF

38. 2.8 Have efforts been made or are foreseen to be undertaken by end of 2025 in your country to foster equitable public-private partnerships on open science in line with the 2021 Recommendation? (ref.: (ii) 17.i)

☐ Yes

☒ No

39. 2.8 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Mainly due to the war.

40. 2.9 Is there a national monitoring framework for open science in your country? Or are there specific indicators on open science included in the national monitoring and evaluation framework for STI policy (ref.: (ii) 17.j, 23.c)

- ☒ Yes
- ☐ Under development
- ☐ No

41. 2.9 cont. **If yes or under development**, please provide details and links as relevant.

In accordance with paragraph 3 of the Order of the Cabinet of Ministers of Ukraine "On Approval of the National Plan for Open Science" dated October 8, 2022 No. 892-p, the Ministry of Education and Science annually monitors the implementation of the National Plan and informs the Cabinet of Ministers about its implementation by January 20 of the year following the reporting year. <https://zakon.rada.gov.ua/laws/show/en/892-2022-%D1%80?lang=uk#Text>

Part 3. INVESTING IN OPEN SCIENCE INFRASTRUCTURES AND SERVICES

42. 3.1 What is the latest official data for your country's percentage of national gross domestic product (GDP) dedicated to research and development expenditure? Please also indicate the year of publication of this data, and to which year(s) it refers. (ref.: (iii) 18.a)

During 2014-2023, GERD decreased by 45% (from 0.6% to 0.33% of GDP). The decrease has been proceeding gradually until 2022, after martial law, it has been accelerating. In 2022-2023, GERD amounted to 0.33% of GDP. However in 2024-2025 the trend is more optimistic - in 2025 R&D state funding has increased by 6% compared to 2024, by 22% compared to 2023.

43. 3.2 What is the latest official data for the percentage of your country's population that have access to reliable internet and bandwidth? Please also indicate the year of publication of this data, and to which year(s) it refers. (ref.: (iii) 18.b)

Data is unavailable.

44. 3.3 Are there national research and education networks (NRENs)[i] active in the country? (ref.: (iii) 18.c)

[i] A national research and education network (NREN) is a specialised internet service provider dedicated to supporting the needs of the research and education communities within a country.

☒ Yes

☐ No

45. 3.3 cont. **If yes**, please provide more information and links as relevant, and indicate to which open science actors in your country those networks are accessible.

URIS and NRAT. Resources are open for all actors. <https://nauka.gov.ua/> and <https://nrat.ukrintei.ua/>

46. 3.4 Are there national or institutional open science infrastructures[i] in your country? (ref.: (iii) 18.d, 18.e, 18.k, 18.l, 18.m)

[i] Some examples of open science infrastructures include major shared scientific equipment or sets of instruments, open computational and data manipulation service infrastructures that enable collaborative and multidisciplinary data analysis, open science platforms and repositories for publications, research data and source codes, archives, open bibliometrics and scientometrics systems for assessing and analysing scientific domains, open laboratories, software forges and virtual research environments, open innovation testbeds, incubators, science museums, science parks and infrastructure for non-digital materials.

- ☐ Yes
- ☒ Under development
- ☐ No

47. 3.4 cont. **If yes or under development**, please indicate which type(s) of infrastructure:

- ☐ federated information technology infrastructure for open science, including high-performance computing, cloud computing and data storage
- ☒ community managed infrastructures, protocols and standards, for example those that support bibliodiversity and engagement with society
- ☒ platforms for exchanges and co-creation of knowledge between scientists and society
- ☒ community-based monitoring and information systems to complement national, regional and global data and information systems

48. 3.4 cont. **If yes or under development**, for each infrastructure, please provide links as relevant and more information with regard to their compliance with the 2021 Recommendation on Open Science in terms of inclusivity, accessibility, interoperability, community governance, FAIR (Findable, Accessible, Interoperable, and Reusable) and CARE (Collective Benefit, Authority to Control, Responsibility and Ethics) principles. Please indicate if the infrastructure is non-commercial.

In 2025, it is planned to create a national data repository based on Ukrainian Institute of Scientific and Technical Expertise and Information. Open Science at the NAS of Ukraine
<https://openscience.nas.gov.ua/>

49. 3.5 Does your country host or fund any federated regional or international information technology infrastructure for open science? (ref.: (iii) 18.e, 18.f)

☒ Yes

☐ No

50. 3.5. cont. **If yes**, please provide links as relevant and more information, including the name of the infrastructure, date of establishment, language, target groups and beneficiaries, governance/community agreements, scope (e.g. research areas, elements of open science, stage of research, accessibility to all the relevant users in the region or internationally).

The National Repository of Academic Texts (NRA) is a nationwide distributed electronic database in which academic texts are accumulated, stored and systematized:
<https://nrat.ukrintei.ua/en/pro-nrat/>

51. 3.6 Is your country involved in any North-South, North-South-South and South-South collaborations to optimize infrastructure use and joint strategies for shared, multinational, regional and national open science platforms? (ref.: (iii) 18.g)

☐ Yes

☒ No

Part 4. INVESTING IN HUMAN RESOURCES, TRAINING, EDUCATION, DIGITAL LITERACY

AND CAPACITY BUILDING FOR OPEN SCIENCE

52. 4.1 Has systematic capacity building on open science taken place in higher education and/or research performing institutions in your country? (ref.: (iv) 19.a, 19.c)

☒ Yes

☐ No

53. 4.1 cont. **If yes**, please indicate if those capacity building initiatives are formal or informal and provide more information and links as relevant.

Examples. The Scientific and Technical Library of National Technical University of Ukraine regularly holds educational events on various aspects of open science. The Open Science page has been created on the Library website. Methodological materials have been developed: Recommendations for drawing up a research data management plan. DMPonline User Manual <https://ela.kpi.ua/items/4b199b04-b3a2-4d5c-b1de-05f5ccf3ce95> Developed instructions for posting scientific (research) data in Zenodo Developed and conducted a series of webinars on scientific (research) data management <https://www.youtube.com/watch?v=v9AkXhHzkJc&list=PLotcMLgU7ilalx3MBYvqamEuDXU-8SB0L> Conducted a course of open lectures "Must-have for research activities" <https://www.youtube.com/watch?v=2mA9HYUeTd&list=PLotcMLgU7ilal43GgFyDK9bbOlzBBQ0ig> Open Science Policy of Sumy State University <https://normative.sumdu.edu.ua/?task=getfile&tmpl=component&id=d6565f9c-9fc9-ee11-98b5-005056015693&kind=1&version=1707881209.2927> and the organized events: <https://library.sumdu.edu.ua/uk/kalendar-podii/podii-tsoho-tyzhnia/3576-vebinar-vidkryti-dostup-vidkryta-nauka-vidkryti-dani-vyklyky-chasu.htm>

54. 4.2 Have capacity building programmes for policy makers on how to integrate core values and principles of open science in STI policies and strategies taken place in your country?

☐ Yes

☒ No

55. 4.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Mainly due to the war. Only grant-funded projects.

56. 4.3 Has a framework of open science competencies been incorporated into higher education research skills curricula in your country, or is it foreseen by the end of 2025? (ref.: (iv) 19.b)

☐ Yes

☒ No

57. 4.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

The open science competencies have not been incorporated into higher education and research skills curricula because of low awareness of open science and restrictions of the state of war. But, the Ministry of Education and Science has developed methodological recommendations on scientific data management for higher education institutions and scientific institutions in terms of determining mechanisms for preserving and reusing scientific data <https://mon.gov.ua/nauka/nauka-2/vidkrita-nauka/informatsiino-metodychni-materialy>

58. 4.4 Are open educational resources[i] as defined in the 2019 Recommendation on Open Educational Resources, used as an instrument for open science capacity building in your country in line with the 2019 Recommendation mentioned above? (ref.: (iv) 19.d)

[i] Open Educational Resources are learning, teaching and research materials in any format and medium that reside in the public domain or are under copyright that have been released under an open license, that permit no-cost access, re-use, re-purpose, adaptation and redistribution by others (2019 Recommendation on Open Educational Resources)

☒ Yes

☐ Partly

☐ No

59. 4.5 Have there been any initiatives in your country to support science communication in line with open science value and principles with a view to the dissemination of scientific knowledge to researchers of different disciplines, decision-makers and the public at large? (ref.: (iv) 19.e)

☐ Yes

☒ No

60. 4.5 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Mainly due to war and low awareness of open science principles outside the circle of open science enthusiasts.

Part 5. FOSTERING A CULTURE OF OPEN SCIENCE AND ALIGNING INCENTIVES FOR OPEN SCIENCE

61. 5.1 Have there been any initiatives at the national or institutional level, e.g. by universities and/or research performing institutions, to review the existing research assessment and evaluation processes in order to align them with open science principles and values or are they foreseen by the end of 2025? (ref.: (v) 20.b, 20c, 20i)

☐ Yes

☒ No

62. 5.1 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

The Ministry of Education and Science did not receive such proposals.

63. 5.2 Have specific clauses that recognize open science practices, including sharing, collaborating and engaging with other researchers and societal actors beyond the scientific community, or dialogue with other knowledge systems, been incorporated in the career evaluation and progression systems or are foreseen by the end of 2025? (ref.: (v) 20.a, 20.c, 20.d)

☐ Yes

☒ No

64. 5.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Specific clauses that recognize open science practices, including sharing, collaborating and engaging with other researchers and societal actors beyond the scientific community, or dialogue with other knowledge systems, has not been incorporated in the career evaluation and progression systems.

65. 5.3 Have there been any initiatives in your country to recognize and reward open science practices or are they foreseen by the end of 2025? (ref.: (v) 20.a, 20.b, 20.c, 20.e, 20.f, 20.g, 20h)

☐ Yes

☒ No

66. 5.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

The lack of infrastructure for open science (repositories of data) makes it impossible to introduce recognition and rewards.

67. 5.4 Have there been any unintended negative consequences[i] of open science practices reported in your country? (ref.: (v) 20)

[i] For example, predatory behaviours, data migration, exploitation and privatization of research data, increased costs for scientists and high article processing charges associated with certain business models in scientific publishing that may be causes of inequality for the scientific communities around the world and, in some cases, the loss of intellectual property and knowledge.

☐ Yes

☒ No

Part 6. PROMOTING INNOVATIVE APPROACHES FOR OPEN SCIENCE AT DIFFERENT STAGES

OF THE SCIENTIFIC PROCESS

68. 6.1 Have there been any initiatives at the national or institutional level that promote innovative, participatory methodological or procedural changes at different stages of the research cycle to increase the openness of the entire scientific process? (*ref.: (vi) 21*)

- ☐ YES, at the national level
- ☐ YES, at the institutional level
- ☐ YES, at both the national and institutional levels
- ☒ No

69. 6.1 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

These initiatives are absent because the current level of implementation of open science practices is low.

Part 7. PROMOTING INTERNATIONAL AND MULTI-STAKEHOLDER COOPERATION IN THE CONTEXT

OF OPEN SCIENCE AND WITH VIEW TO REDUCING DIGITAL, TECHNOLOGICAL AND KNOWLEDGE GAPS

70. 7.1 How is your country promoting and facilitating international scientific collaborations on open science as outlined in the 2021 Recommendation on Open Science? (ref.: (vii) 22.a)

International scientific collaborations on open science are not promoted and facilitated in Ukraine. The reason is lack of available resources in the state of war. But the state, represented by the Ministry of Education and Science of Ukraine, actively participates in grant programs to promote the principles of Open Science, in particular, in the Horizon Europe program.

71. 7.2 Does your country have a strategy or a plan for stimulating cross-border multi-stakeholder collaboration on open science, including with regards to exchange of best practices, capacity building and metrics for open science? (ref.: (vii) 22.b, 22.e, 22.f)

☐ Yes

☒ No

72. 7.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

The country does not have a strategy or a plan for stimulating cross-border multi-stakeholder collaboration on open science. This documents might be developed after the war ends.

73. 7.3 Is your country involved in any discussion on the establishment of regional and international funding mechanisms for open science? (ref.: (vii) 22.c)

☒ Yes

☐ No

74. 7.3 cont. **If yes**, please provide links as relevant and more information.

Projects Open4UA <https://lpnu.ua/en/open4ua> and OPTIMA <https://lpnu.ua/en/optima>

Part 8. GENERAL CONSIDERATIONS

75. 8.1 Are there any specific external causes that may impede the implementation of the 2021 UNESCO Recommendation on Open Science in your country?

☒ Yes

☐ No

76. 8.1 cont. **If yes**, please provide more information.

77. ANY OTHER COMMENTS: If you wish, you may enter any additional comments or information here. You may also contact openscience@unesco.org

We are interested in implementing a national project to implement open science practices, which will involve at least one representative from each higher education institution and research institutions. The Russian Federation's ongoing military aggression significantly limits the country's financial resources and hinders planning. For example, it is impossible to choose a location for e-infrastructure that will be completely protected from possible destruction due to bombing or missile attacks.
