

A. GENERAL INFORMATION ABOUT THE RESPONDANT:	
Country: Brazil	Brazil
Organization(s) or entity(ies) responsible for the preparation of the report *:	
Name:	Ministry of Science, Technology and Innovation (MCTI)
Website:	https://www.gov.br/mcti/pt-br
E-mail address: *	
Phone Number: *	
Please describe the role/mandate of your organization:	The Ministry of Science, Technology and Innovation (MCTI), as stated in Decree nº 11493/2023, is responsible for: (i) national science, technology and innovation policies; (ii) planning, coordination, supervision, monitoring and evaluation of science, technology and innovation activities; (iii) digital transformation and automation development policies; (iv) national biosafety policy; (v) space policy; (vi) nuclear policy; (vii) control of the export of sensitive goods and services; and (viii) articulation with the Governments of the States, the Federal District and the Municipalities, with society and with the agencies of the Federal Government, with a view to establishing guidelines for national policies on science, technology and innovation.
Officially designated contact person(s) who completed this survey:	
Full name: *	Bianca Amaro de Melo
Position:	Head, Office for Data Governance, Department of Data Governance and Science and Technology Indicators, Executive Secretariat, Ministry of Science, Technology and Innovation (COGGD/CGDI/DGIT/MCTI)
Email address: *	
Full Name(s) of designated official(s) certifying the report:	Verena Hitner Barros; Director, Department of Data Governance and Science and Technology Indicators, Executive Secretariat, Ministry of Science, Technology and Innovation (DGIT/MCTI);
Brief description of the consultation process established for the preparation of the report:	Brazil is one of the founders of the Open Government Partnership (OGP), established in 2011, and since then it has agreed on national action plans designed to meet the OGP goals. The 6th Brazilian Open Government Action Plan, for the period 2023-2027, 2024-2027, brings as its 3rd commitment "Collaborative Practices for Science and Technology", under which 13 activities were defined. The questionnaire was sent to representatives of the institutions that are engaged in those activities, their answers were analysed and organised by DGIT/MCTI, the final text being the sole responsibility of MCTI.
Other organization(s) or entity(ies) (including non-governmental) consulted for completing this survey:	
Name of the organization: *	ABC - Academia Brasileira de Ciências Brazilian Academy of Sciences
Website: *	https://www.abc.org.br/
Email address: *	
Sector: () Public () Private () Civil Society () Other	Civil society
Name of the organization: *	ABEC - Associação Brasileira de Editores Científicos (Brazilian Association of Scientific Editors)
Website: *	https://www.abecbrasil.org.br
Email address: *	
Sector: () Public () Private () Civil Society () Other	Civil society
Name of the organization: *	ANPG - Associação Nacional de Pós-Graduandos (National Association of Post-Graduate Students)

B. Questionnaire for Member States' reporting on the implementation of the 2021 Recommendation

Nº	Question	Answer () YES / () NO	Description	Detailed Response
1	PROMOTING A COMMON UNDERSTANDING OF OPEN SCIENCE, ASSOCIATED BENEFITS, AND CHALLENGES, AS WELL AS DIVERSE PATHS TO OPEN SCIENCE			
1.1	Has the 2021 Recommendation been promoted and/or shared with appropriate ministries and institutions as well as affiliated organizations in your country?	Yes	If yes, please indicate which ministries and/or national authorities/entities have been involved in the promotion of the 2021 Recommendation. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	The Recommendation has been disseminated through various channels in Brazil and through lectures on Open Science
1.2	Is the 2021 Recommendation on Open Science available in the national language(s) of your country?	YES	If yes, which language(s)?	Portuguese
1.3	Have there been awareness raising activities on open science, including all its key elements', associated benefits and challenges, organized or foreseen to be organized by the end of 2025 in your country by national authorities or entities? (ref.: (i) 16.f, 16.q, 16.h)	Yes		The Brazilian Society for the Advancement of Science (SBPC) has promoted debates on open science at its annual meetings. It has also organised publications on the topic, such as a special edition on the topic in the Jornal da Ciência newspaper and an issue of the Ciência & Cultura magazine (< https://revistacienciaecultura.org.br/ >). Under the 6th Brazilian Action Plan of the Open Government Partnership (OGP), 2024-2027, Commitment 3 seeks to promote transparent, collaborative and reproducible scientific practices, expanding the social impact of science. Among its actions, Milestone 9 provides for awareness-raising activities on open science, aimed at researchers, public institutions and civil society. These initiatives are conducted by national and/or international entities and authorities and aim to disseminate the benefits and challenges of open science, strengthening the culture of open access and transparency in the country (see pages 21-29 at https://www.gov.br/cgu/pt-br/governo-aberto/a-ogp/planos-de-acao/6deg-plano-de-acao-brasileiro/brazil_action-plan_2023-2027_december_pt.pdf). The Brazilian Reproducibility Network hosted a free conference on Reproducibility in Brazilian Research as a preparatory activity for the 5th National Conference on Science, Technology, and Innovation (available at https://www.youtube.com/watch?v=CMh2448s1mY and https://www.youtube.com/watch?v=tLKCIGEMxfw), addressing various aspects of open science. It also developed recommendations for the valorisation of open and reproducible science in the evaluation of postgraduate programmes by CAPES (https://osf.io/8ysj2), presenting them to the agency's Technical Scientific Council. Similar recommendations were recently developed for national journals (https://osf.io/spnry). The 14th CONFOA (Lusophone Conference on Open Science) was held in 2023 at the Federal University of Rio Grande do Norte, in the city of Natal. Between 8 and 11 September, the 16th CONFOA - Lusophone Conference on Open Science will take place at the Federal University of Goiás (UFG), in Goiânia. In 2024, the 1st UFG Open Science Week was held to promote the theme among the academic and regional community. The Brazilian Institute of Information in Science and Technology (Ibict), in collaboration with the Foundation for Science and Technology of Portugal and the University of Minho, also in Portugal, has been a permanent organiser of ConfOA since its inception. The 2025 edition of the Conference is organised locally by the Federal University of Goiás (UFG). In July 2025, the III Meeting of the Brazilian Network of Digital Repositories will also be held, a joint organisation of the Brazilian Institute of Science and Technology Information (Ibict), the Oswaldo Cruz Foundation (Fiocruz), Brazilian Centre for Physics Research (CBPF), Federal University of Amazonas (UFAM), Federal University of Rio Grande do Norte (UFRN), Federal University of Goiás (UFG), Federal University of Rio Grande (FURG) and Federal University of Rio Grande do Sul (FURG). The purpose of this meeting is to bring together the community involved in research publication and data repositories to discuss ways to maintain and

B. Questionnaire for Member States' reporting on the implementation of the 2021 Recommendation

Nº	Question	Answer () YES / () NO	Description	Detailed Response
1.4	Have specific actions been undertaken or are planned to be undertaken by end of 2025 in your country to incorporate the values and principles of open science", in publicly funded research? (ref.: (i) 16.a. 16.b. 16.c. 16.d. 16.e. 16.h)	Yes		The Brazilian Institute of Information in Science and Technology (Ibict) coordinated the implementation of a commitment in the 5th Open Government Partnership (OGP) Plan, related to new evaluation mechanisms in science, in order to promote Open Science. The results of the implementation of this commitment are summarised at: https://www.gov.br/ibict/pt-br/assuntos/informacao-cientifica/ogp-brasil . In addition, the Brazilian Institute of Science and Technology Information is responsible for coordinating Milestone 04 - 'Development of a proposal on how to incorporate open practices into the evaluation criteria for researchers and institutions, based on the 5th National Action Plan,' in the 6th OGP Plan, in a commitment related to the theme of Open Science. The Brazilian Reproducibility Network is currently developing a list of recommendations for promoting open science in Brazilian postgraduate programmes, which is expected to be published by the end of 2025. FAPESP, the São Paulo State Research Foundation, has established a Policy for Open Access to Publications and requires that any institution or researcher applying for research grants present a data management plan (https://fapesp.br/12632/portaria-cta-no-012019). FAPESP also requires that the research results funded by the Foundation be deposited in open access repositories, whether institutional or other scientific data repositories. This policy aims to ensure that research funded with public resources is widely accessible and disseminated.
2	DEVELOPING AN ENABLING POLICY ENVIRONMENTE FOR OPEN SCIENCE			
2.1	Does your country have a national policy", strategy or plan of action on science, technology and innovation (ST)?		If yes, please attach/upload a machine-readable PDF file of the policy and provide the following information: Title of the policy, the authority in charge of development of the policy, entities involved and the process of development, year of adoption, year of last update, key areas/sections of the policy, and links to the webpage if available. Does it include any of the following open science elements: • open access to scientific knowledge • open science infrastructure • open engagement of societal actors • open dialogue with other knowledge systems If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	Since 2007, MCTI has conducted a process for designing action plans and national strategies for STI, in consultation with stakeholders. Social dialogue occurs through all the instruments provided by Brazilian law, including public hearings, public consultations and active transparency. The Council of Science and Technology (CCT), an advisory council, meets regularly twice a year and is responsible for proposing to the President the country's Science and Technology policy. For the formulation of National STI Strategy for 2016-2022 (ENCTI 2016-2022), MCTI held several meetings with stakeholders and submitted it to CCT for approval. The 5th National Conference on Science, Technology and Innovation (CNCTI) held in 2024, aimed at discussing important issues which could be part of the new ENCTI. It was preceded by open preparatory conferences in the 27 Brazilian states. Their results, grouped by themes, were presented and discussed at CNCTI, which yielded recommendations, registered in the STI Violet Book, the basis for designing the new ENCTI. Chapter 14 addresses open science. The event had in-person participation of 2,500 people at the opening ceremony and a total accumulated 5,300 in-person participants, 4,000 online individual registrations, and 21,000 views via YouTube, as counted by August 3rd, 2025. The program consisted of eight plenary sessions and 54 parallel sessions. Upon conclusion, the draft ENCTI will be submitted to public consultation. ENCTI 2016-2022: https://antigo.mctic.gov.br/mctic/export/sites/institucional/ciencia/SEPED/ciencias_humanas/Publicacoes/16_03_2018_Estrategia_Nacional_de_Ciencia_Tecnologia_e_Inovacao_2016_2022.pdf 5th CNCTI Violet Book: https://ad5cncti.cgee.org.br/documents/165901/355373/livro-violeta_5CNCTI.pdf
2.2	In your country, is there a policy, or a set of policies and/or legal frameworki((s)h' at the national level that address open science or any of its key elements in line with the definition, values and principles outlined in the 2021 recommendation on Open Science ? (ref.: (i) 16.a, 16.b, 16.c, 16.d, 16.e, 16.h)	No	If yes or partly, please attach/upload machine-readable PDF file(s) of the policy(ies) and provide the following information for each: Title of the policy or legal instrument, the authority in charge of development of the policy, entities involved and the process of development, year of adoption, year of last update, key areas/sections of the policy, elements of open science that are addressed, and links to the webpage(s) if available. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such policies.	No, there is no consolidated national policy, although Brazil is engaged in the Open Government Partnership (OGP) since 2011. The 4th, 5th and the 6th Brazilian Action Plans for Open Government bring activities which show the commitment of the country with open science. The 6th Action Plan, Commitment #3, Collaboration Practices for Science and Technology, consists of 13 sets of activities, which will contribute to the design of a national policy for open science (see Milestone 7) and corresponding Action Plan (see Milestone 8). 6th Open Government Action Plan (see pages 21-29): https://www.gov.br/cgu/pt-br/governo-aberto/a-ogp/planos-de-acao/6deg-plano-de-acao-brasileiro/brazil_action-plan_2023-2027_dezembro_pt.pdf

B. Questionnaire for Member States' reporting on the implementation of the 2021 Recommendation

Nº	Question	Answer () YES / () NO	Description	Detailed Response
2.3	In your country, are there specific policy instruments" that aim to promote open science?	No	If yes or under development, please provide details and links as relevant, including for each instrument: Title of the instrument, its objective, the authority in charge, allocated budget, elements of open science included. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such policy instruments.	No, at the national level. However there are institutional level documents, related to Open Science policies, with a model case being that of the Oswaldo Cruz Foundation (Fiocruz), which has formalised its actions on the subject through a set of documents. Examples: https://sei.fiocruz.br/sei/publicacoes/controlador_publicacoes.php?acao=publicacao_visualizar&id_documento=775494&id_orgao_publicacao=0, which establishes the governance of Open Science at the Oswaldo Cruz Foundation (Fiocruz). In addition, the Oswaldo Cruz Foundation (Fiocruz) published its ‘Policy on data management, sharing and openness for research: principles and guidelines’ (< https://www.arca.fiocruz.br/handle/icict/46408 >). The Coordination for the Improvement of Higher Education Personnel (CAPES) published the reference document containing the common guidelines for the permanence evaluation process (https://www.gov.br/capes/pt-br/centrais-de-conteudo/documentos/avaliacao/19052025_20250502_DocumentoReferencial_FIC_HA.pdf), on 02/05/2025, which included open science and good practices in training, research and scientific dissemination as one of the evaluation dimensions (pg 64).
2.4	In your country, is there a national implementation plan, strategy, policy or a roadmap for implementation of open science at the national level in line with the 2021 Recommendation? ref.: (ii) 17.a, 17.b, 17.c, 17.f, 17.h)	No	If yes or under development, please provide details and links as relevant, including the name of ministries and national authorities/entities, as well as affiliated organizations that are involved in the development and implementation of the plan, strategy or the roadmap. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such policy instruments.	See answer to question 2.2.
2.5	In your country, are there policies and/or strategies that promote open science in line with the 2021 Recommendation at institutional level, including in the context of research-performing institutions, universities, scientific unions and associations and learned societies (ref.: (ii) 17.d. 17.e. 17.g)	Yes	If yes, please provide more information, Including the number of policies, name of the institute(s) that has/have developed the policy(s) and elements of open science, included in the policy (please consider policies and strategies addressing all elements of open science, including citizen and participatory science, or co production of knowledge with multiple actors).	Oswaldo Cruz Foundation (Fiocruz): 2 policies - Open Access to Knowledge Policy (https://www.arca.fiocruz.br/handle/icict/68656) and Policy on Management, Sharing and Opening of Data for Research (https://www.arca.fiocruz.br/handle/icict/46408). Federal University of Goiás (UFG): Institutional Development Plan - encouraging institutional actions related to Open Science. The State University of Campinas (UNICAMP) has an institutional open access policy: https://www.pg.unicamp.br/norma/23869/0. The University of São Paulo (USP) has open science policies, including open access, shared infrastructure and citizen science (https://cienciaaberta.usp.br/). The Hospital de Clínicas de Porto Alegre has infrastructure to support data management and has already conducted small experiments in selection processes to evaluate researchers according to the Hong Kong Principles (which include recognition of open science practices).
2.6	In your country, are there specific funding mechanisms" for open science at the national level? (ref.: (ii) 17.i. (iii) 18.i. (iv) 19. c)	Yes	If yes or under development, please provide details and links as relevant. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such funding mechanisms.	The National Institute of Citizen Science (INCC) (https://incc.tcti.ibict.br/) aims to promote the advancement of scientific and technological knowledge, of an interdisciplinary and transdisciplinary nature, for the development, innovation, and dissemination of concepts, practices, methodologies, and uses of Citizen Science in Brazil. The Institute receives financial support from the National Council for Scientific and Technological Development (CNPq) and the Coordination for the Improvement of Higher Education Personnel (CAPES), in the form of scholarships and research grants. CAPES published Ordinance No. 120/2024 (https://cad.capes.gov.br/ato-administrativo-detalhar?idAtoAdmElastic=14902), which provides for the payment of Article Processing Charges for open access publications within the scope of the Journal Portal. This ordinance defines rules and technical criteria for the eligibility of authors, journals, and publishers, requiring, for example, the adoption of peer review, DOI assignment, digital preservation, open licence (such as CC-BY), and that contracts operate with unlimited APCs. The support is aimed at authors linked to stricto sensu postgraduate programmes evaluated by CAPES or accredited federal public bodies. In addition, CAPES participates in the nationalisation of SciELO in partnership with the São Paulo Research Foundation (FAPESP) and CNPq to strengthen national journals through actions involving investment in infrastructure maintenance and the internationalisation of Brazilian research.

B. Questionnaire for Member States' reporting on the implementation of the 2021 Recommendation

Nº	Question	Answer () YES / () NO	Description	Detailed Response
2.7	In your country, have open science practices been integrated in existing research funding mechanisms?	No	If yes, please provide details and links as relevant. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	No, at the national level. The issue is present in ongoing discussions and will certainly be part of the next National STI Strategy. However, three examples can be mentioned, each from a different type of institutional level: federal, state and private. Oswaldo Cruz Foundation (Fiocruz): In the call for proposals for the Inova Programme for the Promotion of Research and Technological Development (PIPDT) - Institute of Communication and Information in Health (Icict)/Fiocruz, the preparation of a data management plan was incorporated as a requirement for funding. https://pipdt.icict.fiocruz.br/ The São Paulo Research Foundation (FAPESP) has systematically included the request for a Data Management Plan in its various calls for funding. < https://fapesp.br/gestaodedados > and a Policy for Open Access to Publications Resulting from FAPESP Grants and Scholarships < https://fapesp.br/12632/portaria-cta-no-012019 > The Serrapilheira Institute has developed a Guide to Good Practices in Open and Reproducible Science, which is attached to its calls for proposals < https://serrapilheira.org/wp-content/uploads/2019/11/serrapilheira-guia-ciencia-aberta-e-reprodutivel.pdf >
2.8	Have efforts been made or are foreseen to be undertaken by end of 2025 in your country to foster equitable public-private partnerships on open science in line with the 2021 Recommendation? (ref.: (ii) 17.i)	No	If yes, please provide details and links as relevant. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	Such efforts are not presently embedded in the instruments that support public-private partnerships, but are being
2.9	Is there a national monitoring framework for open science in your country? Or are there specific indicators on open science included in the national monitoring and evaluation framework for STI policy (ref.: (ii) 17.i. 23.c)	Under development	If yes or under development, please provide details and links as relevant	The Brazilian Open Science Observatory (OCABr), coordinated by SciELO (Scientific Electronic Open Library), which
3	INVESTING IN OPEN SCIENCE INFRASTRUCTURE AND SERVICES			
3.1	What is the latest official data for your country's percentage of national gross domestic product (GDP) dedicated to research and development expenditure? Please also indicate the year of publication of this data, and to which year(s) it refers (ref.: (iii) 18.a)	Yes		1.14% of Brazil's national gross domestic product is dedicated to R&D expenditure. It refers to 2020 and it was published in 2022. https://www.gov.br/mcti/pt-br/acompanhe-o-mcti/indicadores/paginas/recursos-aplicados/indicadores-consolidados/2-1-8-brasil-comparacao-dos-dispendios-em-pesquisa-e-desenvolvimento-com-o-produto-interno-bruto
3.2	What is the latest official data for the percentage of your country's population that have access to reliable internet and bandwidth? Please also indicate the year of publication of this data, and to which year(s) it refers (ref.: (iii) 18.b)	YES		According to recent data (April 2025) presented by the Ministry of Communications, 93% of Brazilian households h

B. Questionnaire for Member States' reporting on the implementation of the 2021 Recommendation

Nº	Question	Answer () YES / () NO	Description	Detailed Response
3.3	Are there national research and education networks (NRENs) active in the country? (ref.:(iii)18.c)	YES	If yes, please provide more information and links as relevant, and indicate to which open science actors in your country those networks are accessible. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to establish them.	The Brazilian NREN is the National Education and Research Network (RNP) – an organisation linked to the Ministry
3.4	Are there national or institutional open science infrastructures in your country (ref.:(iii)18.d, 18.e, 18.k, 18.l, 18.m)	YES	If yes or under development, please indicate which type(s) of infrastructure: • federated information technology infrastructure for open science, including high performance computing, cloud computing and data storage. • community managed infrastructures, protocols and standards, for example those that support bibliodiversity and engagement with society • platforms for exchanges and co-creation of knowledge between scientists and society • community-based monitoring and information systems to complement national, regional and global data and information systems. For each infrastructure, please provide links as relevant and more information with regard to thefr compliance with the 2021 Recommendation on Open Science in terms of inciusivity, accessibility, interoperability, community governance, FAIR (Findable, Accessible, Interoperable, and Reusable) and CARE (Collective Benefit, Authority to Control, Responsibility and Ethics) principles. Please indicate if the infrastructure is non-commercial. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so	One of UNESCO's recommendations concerns the promotion of non-commercial open science infrastructures, incl

B. Questionnaire for Member States' reporting on the implementation of the 2021 Recommendation

Nº	Question	Answer () YES / () NO	Description	Detailed Response
3.5	Does your country host or fund any federated regional or international information technology infrastructure for open science (ref.:(iii)18.e, 18.f)	YES	if yes, please provide links as relevant and more information, including the name of the infrastructure, date of establishment, language, target groups and beneficiaries, governance/community agreements, scope (e.g. research areas, elements of open science, stage of research, accessibility to all the relevant users in the region or internationally). If no, are the existing open science infrastructures at regional and international levels accessible to all the relevant open science actors from your country?	The CAFE Federation (Federated Academic Community < https://ajuda.rnp.br/cafe >), coordinated by the National
3.6	Is your country involved in any North-South, North-South-South and South-South collaborations to optimize infrastructure use and joint strategies for shared, multinational, regional and national open science platforms (ref.:(iii)18.g)	YES	If yes, please provide links as relevant and more information, including the name of the infrastructure, date of establishment, language, target groups and beneficiaries, governance/community agreements, scope (e.g. research areas, elements of open science), stage of research, accessibility to all the relevant users in the region or internationally).	The deployment of the Ellalink submarine cable by the Bella programme (< https://bella-programme.eu >) has imp
4	INVESTING IN HUMAN RESOURCE, TRAINING, EDUCATION, DIGITAL LITERACY AND CAPACITY BUILDING FOR OPEN SCIENCE			

B. Questionnaire for Member States' reporting on the implementation of the 2021 Recommendation				
Nº	Question	Answer () YES / () NO	Description	Detailed Response
4.1	Has systematic capacity building on open science taken place in higher education and/or research performing institutions in your country?(ref.: (iv) 19.a, 19.c)	Yes	If yes, please indicate if those capacity building initiatives are formal or informal and provide more information and links as relevant. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	In addition to advancing the implementation of data repositories, in partnership with the Brazilian Network of Digital
4.2	Have capacity building programmes for policy makers on how to integrate core values and principles of open science in STI policies and strategies taken place in your country?	No	If yes, please provide more information and links as relevant. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	A specific program has not yet been created, but training and awareness raising among policy makers has been promoted through several lectures and meetings.
4.3	Has a framework of open science competencies been incorporated into higher education research skills curricula in your country, or is it foreseen by the end of 2025 (ref.: (iv) 19.b)	No	If yes, please provide more information and links as relevant. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	No, as a recommendation at national level, since curricular reforms are complex and take time. Some universities, however, have already started to address the issue in their curricula, notably in the area of Information Science.
4.4	Are open educational resources* as defined in the 2019 Recommendation on Open Education Resources, used as an instrument for open science capacity building in your country in line with the 2019 Recommendation mentioned above? (ref.: (iv) 19.d)	No	YES/ PARTLY/ NO	No, at national level. Oswaldo Cruz Foundation (Fiocruz), a research institute of the Ministry of Health, has a modu
4.5	Have there been any initiatives in your country to support science communication in line with open science value and principles with a view to the dissemination of scientific knowledge to researchers of different disciplines, decision-makers and the public at large? (ref.: (iv) 19.e)	YES	If yes, please provide more information and links as relevant. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	The SciELO Programme is a pioneer in Open Access scientific communication. The SciELO Publication Model, devel
5	FOSTERING A CULTURE OF OPEN SCIENCE AND ALIGNING INCENTIVES FOR OPEN SCIENCE			

B. Questionnaire for Member States' reporting on the implementation of the 2021 Recommendation				
Nº	Question	Answer () YES / () NO	Description	Detailed Response
5.1	Have there been any initiatives at the national or institutional level, e.g. by universities and/or research performing institutions, to review the existing research assessment and evaluation processes in order to align them with open science principles and values or are they foreseen by the end of 2025.	Yes	If yes, please provide more information and links as relevant. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	The Coordination for the Improvement of Higher Education Personnel (CAPES), an agency of the Ministry of Educa
5.2	Have specific clauses that recognize open science practices, including sharing, collaborating and engaging with other researchers and societal actors beyond the scientific community, or dialogue with other knowledge systems, been incorporated in the career evaluation and progression systems or are foreseen by the end of 2025? (ref.: (v) 20.a. 20.c. 20.d)	No	If yes, please provide details and links as relevant. If no, please, if possible, briefly explain the reason and the difRculties or obstacles in this area and indicate if there are plans to do so.	No, at national level. However, at institutional level, the Federal University of Goiás, included the item "material resources deposited in scientific production repositories" in the teachers' evaluation criteria.
5.3	Have there been any initiatives in your country to recognize and reward open science practices or are they foreseen by the end of 2025 (ref.: (v) 20.a. 20.b, 20.c, 20.e. 20.f. 20.g, 20h)	Yes	If yes, for each initiative, please provide more information, including on the stakeholders"" that are involved or lead the initiative, and links as relevant. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	The Federal University of Goiás, included the item "material resources deposited in scientific production repositories" in the teachers' evaluation criteria.
5.4	Have there been any unintended negative consequences"" of open science practices reported in your country? (ref.: (v) 20)	No	If yes, please provide more information and specify if there is a strategy or plan to preventing and mitigating such consequences.	It does not apply as yet, since no practices have been extensively implemented.
6	PROMOTING INNOVATIVE APPROACHES FOR OPEN SCIENCE AT DIFFERENT STAGES OF THE SCIENTIFIC PROCESS			
6.1	Have there been any initiatives at the national or institutional level that promote innovative, participatory methodotogical or procedural changes at different stages of the research cycle to increase the openness of the entire scientific process? (ref.: (vi) 21)	Yes	YES, at the national level. YES, at the institutional level. YES. at both national and institutional levels. NO If yes, indicate which of the recommended actions they address and provide more information and links as relevant: • promotion of pre-prints • exploration of open peer-review practices •valuing and sharing of negative scientific results and associated data • participatory methods that value inputs from societal actors, e.g. citizen science, crowdsourcing scientific projects • development of participatory strategies for identifying the needs of marginalized communities and highlighting socially relevant issues to be incorporated into research agendas. • promoting open innovation practices. • Others (with a box to add text) If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	There are initiatives at institutional level as follows:The SciELO Program has been promoting the adoption of the O
7	PROMOTING INTERNATIONAL AND MULTI-STAKEHOLDER COOPERATION IN TNE CONTEXT OF OPEN SCIENCE AND WITH VIEW TO REDUCING DIGITAL, TECHNOLOGICAL AND KNOWLEDGE GAPS			

B. Questionnaire for Member States' reporting on the implementation of the 2021 Recommendation

Nº	Question	Answer () YES / () NO	Description	Detailed Response
7.1	How is your country promoting and facilitating international scientific collaborations on open science as outlined in the 2021 Recommendation on Open Scienc? (ref.: (vii) 22.a)	YES		The Lusophone Open Science Conference (ConfOA) is held annually. ConfOA originated 16 years ago, from the Memorandum of Understanding signed between the Ministers of Science and Technology of Portugal and Brazil in 2009, and is recognised as an event of international relevance. Initially known as the Luso-Brazilian Open Access Conference, it underwent an evolution that culminated in 2019 in the change to its current name, reflecting its Portuguese-speaking scope and the agendas involving Open Science. ConfOA aims to bring together the Portuguese, Brazilian and other Portuguese-speaking communities that are dedicated to research, development, service management and policy-making related to Open Science in all its aspects. Brazil has a representative (Federal University of Goiás) on the organising committee of the Open Repositories event, one of the main conferences on open repositories worldwide, which annually sees the participation of researchers presenting experiences in Brazilian open repositories. The Brazilian Reproducibility Network (RBR) is part of a working group coordinated by the UK Reproducibility Network dedicated to the formation and sustainability of a global federation of reproducibility networks. The SciELO Network is an international collaboration involving 17 countries; Brazil is the national node of the Latin American Open Science Network (LA Referencia), which offers its services and supports national Open Access strategies in Latin America and Spain through a platform with standards for interoperability, sharing and visibility of scientific production generated in higher education and scientific research institutions.
7.2	Does your country have a strategy or a plan for stimulating cross-border multi-stakeholder collaboration on open science, including with regards to exchange of best practices, capacity building and metrics for open science?	No	If yes. please provide links as relevant and more information. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.	The issue is under discussion for possible inclusion in the National STI Strategy which is being designed.
7.3	Does your country involve in any discussion on the establishment of regional and international funding mechanisms for open science? (ref.: https://unesdoc.unesco.org/ark:/48223/pf0000379949/PDF/379949enq.pdf.multi.nameddest=20/p.nameddest=20/.page=21)	No	If yes, please provide links as relevant and more information. If no, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and plans to do so.	Mercosur is discussing a recommendation on the promotion of open science, which does not involve funding. Therefore, Brazil is not presently engaged in any discussion with other countries on funding open science.
8	GENERAL CONSIDERATIONS GERAIS			
8.1	Are there any specific external causes that may impede the implementation of the 2021 UNESCO Recommendation on Open Science in your country?	No	If yes, please provide more information.
