Time to complete

A. General information about the respondent

1. * Country

Norway

2. * Name of organization(s) or entity(s) responsible for the preparation of the report

The Norwegian Ministry of Education and Research

3. * Website of organization(s) or entity(s) responsible for the preparation of the report

<https://www.regjeringen.no/en/dep/kd/id586/>

4. * Email address of organization(s) or entity(s) responsible for the preparation of the report

5. Phone number of organization(s) or entity(s) responsible for the preparation of the report

6. Please describe the role/mandate of your organization

Ministry of Education and Research is responsible for primary and secondary school, upper secondary and tertiary vocational education and higher education sectors, kindergartens, cultural schools, vocational education, research and training and adult learning.

7. * Full name of officially designated contact person(s) who completed this survey

Marte Qvenild

8. * Position of officially designated contact person(s) who completed this survey

Senior advisor

9. * Email address of officially designated contact person(s) who completed this survey

10. Full Name(s) of designated official(s) certifying the report

Marthe Northug

11. Brief description of the consultation process established for the preparation of the report

12. * Name of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey

The Research Council of Norway

13. * Website of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey
(Please use commas to separate multiple links, as: link A, link B)

<https://www.forskningsradet.no/en/>

14. * Email address of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey

15. Sector of other organization(s) or entit(y)(ies) (including non-governmental) consulted for completing this survey

B. QUESTIONNAIRE FOR MEMBER STATES' REPORTING

ON THE IMPLEMENTATION OF THE 2021 RECOMMENDATION ON OPEN SCIENCE

Part 1. PROMOTING A COMMON UNDERSTANDING OF OPEN SCIENCE,

ASSOCIATED BENEFITS AND CHALLENGES, AS WELL AS DIVERSE PATHS TO OPEN
SCIENCE

16. 1.1 Has the 2021 UNESCO Recommendation on Open Science been promoted and/or shared with appropriate ministries and institutions as well as affiliated organizations in your country?

☒

Yes

☐

No

17. 1.1 cont. **If yes**, please indicate which ministries and or national authorities/entities have been involved in the promotion of the 2021 Recommendation.

Ministry of Education and Research and the Research Council of Norway

18. 1.2 Is the 2021 Recommendation on Open Science available in the national language(s) of your country?

☒ Yes

☐ No

19. 1.2 cont. **If yes**, which language(s)?

Norwegian

20. 1.3 Have there been awareness raising activities on open science, including all its key elements[i], associated benefits and challenges, organized or foreseen to be organized by the end of 2025 in your country by national authorities or entities? (*ref.: (i) 16.f, 16.g, 16.h*)

[i] Please refer to the elements of open science defined in the 2021 Recommendation, namely : open scientific knowledge (including open access to scientific publications, research data, open educational resources, open-source software and code, open hardware), open science infrastructures, open engagement of societal actors and open dialogue with other knowledge systems.

☒ Yes

☐ No

21. 1.3 cont. **If yes**, please provide details on the activities organized or foreseen and links as relevant.

The Norwegian Agency for Shared Services in Education and Research (Sikt) has established a website with updates and awareness rising that they are running together with the RCN. At this website there is an updated overview of national and international activities related to open science.

22. 1.4 Have specific actions been undertaken or are planned to be undertaken by end of 2025 in your country to incorporate the values and principles of open science[i], in publicly funded research? (ref.: (i) 16.a, 16.b, 16.c, 16.d, 16.e, 16.h)

[i] The 2021 Recommendation outlines a set of shared values of open science stemming from the rights-based, ethical, epistemological, economic, legal, political, social, multi-stakeholder and technological implications of opening science to society and broadening the principles of openness to the whole cycle of scientific research. It also provides a set of guiding principles, as a framework for enabling conditions and practices, which uphold the values of open science and can realize the ideals of open science.

Please see the values of open science, namely quality and integrity, collective benefit, equity and fairness, and diversity and inclusiveness.

Please see the guiding principles for open science ,namely transparency, scrutiny, critique and reproducibility; equality of opportunities; responsibility, respect and accountability; collaboration, participation and inclusion; flexibility and sustainability.

☒ Yes

☐ No

23. 1.4 cont. If **yes**, please indicate the actions that are taken to incorporate the specific values and principles. For each case, please provide details and links as relevant.

The RCN has incorporated open science values and principles in their assessment of grant applications Link: Assessment of open science in grant applications Specifically related to 16.d "Encouraging multilingualism in the practice of science, in scientific publications and in academic communications" it is relevant to mention the Norwegian scheme for open journals in the social sciences and humanities (NÅHST) . This is financed by the Ministry of Education and the Research Council of Norway. Link (only in Norwegian): Norskspråklege opne tidsskrift innanfor humaniora og samfunnsvitskap | HK-dir

Part 2. DEVELOPING AN ENABLING POLICY ENVIRONMENT FOR OPEN SCIENCE

24. 2.1 Does your country have a national policy[i], strategy or plan of action on science, technology and innovation (STI)?

[i] National STI policy is most commonly a governmental document developed by governing bodies leading the STI policy design and implementation in a given country, which formulates objectives and guides actions and decision-making processes in the area of STI on the national level.

☒ Yes

☐ No

25. 2.1 cont. **If yes**

- please share a machine-readable PDF file of the policy using this link: <https://tinyurl.com/27p5zct8> designating openscience@unesco.org as the recipient, and provide the following information: *Title of the policy, the authority in charge of development of the policy, entities involved and the process of development, year of adoption, year of last update, key areas/sections of the policy, and links to the webpage if available.*

In the comment box, please indicate the question number for this attachment / document.

After uploading, please return to this page to continue the survey.

Norway have several national policies related to or specifically mentioning open science, for example: Meld. St. 5 (2022–2023) Nasjonale mål og retningslinjer for åpen tilgang til vitenskapelige artikler NOU 2024: 14 nfr-policy-open-science-eng.pdf Strategi for å øke næringslivets investeringer i forskning og utvikling - regjeringen.no

26. 2.1 cont. **If yes:**

- does it include any of the following open science elements:

- ☒ open access to scientific knowledge
- ☒ open science infrastructure
- ☒ open engagement of societal actors
- ☐ open dialogue with other knowledge systems

27. 2.2 In your country, is there a policy, or a set of policies and/or legal framework(s)[i] at the national level that address open science or any of its key elements in line with the definition, values and principles outlined in the 2021 Recommendation on Open Science? (ref.: (i) 16.a, 16.b, 16.c, 16.d, 16.e, 16.h)

[i] These can include specific national policies, sets of guidelines, rules, regulations, laws, principles, or directions to govern open science practices.

- ☒ Yes
- ☐ Partly
- ☐ No

28. 2.2 cont. **If yes or partly**, please share a machine-readable PDF file(s) of the policy(ies) using this link: <https://tinyurl.com/27p5zct8> designating openscience@unesco.org as the recipient, and provide the following information for each: *Title of the policy or legal instrument, the authority in charge of development of the policy, entities involved and the process of development, year of adoption, year of last update, key areas/sections of the policy, elements of open science that are addressed, and links to the webpage(s) if available.*

Meld. St. 5 (2022–2023) nfr-policy-open-science-eng.pdf Strategi for vitenskapelig publisering etter 2024

29. 2.3 In your country, are there specific policy instruments[i] that aim to promote open science?

[i] Policy instruments include programmes, methods and mechanisms of technical and operational nature, required to solve the issues set by the policy, with focus on the target beneficiaries, resources, indicators, and set of goals for delivering products (short term), results (medium-term), and impacts (long term).

- ☒ Yes
- ☐ Under development
- ☐ No

30. 2.3 cont. **If yes or under development**, please provide details and links as relevant, including for each instrument: *Title of the instrument, its objective, the authority in charge, allocated budget, elements of open science included.*

the Norwegian scheme for open journals in the social sciences and humanities (NÅHST) National open archive: Nasjonalt vitenarkiv (NVA) the Norwegian Register of Scientific Publishing Channels as a register of recommended publication channels and as a gatekeeper against unreliable channels and those operating in the gray-zone: kanalregister.hkdir.no Publish and read agreements in Norway: Open Science | Forhandlingsrådet

31. 2.4 In your country, is there a national implementation plan, strategy, policy or a roadmap for implementation of open science at the national level in line with the 2021 Recommendation? (ref.: (ii) 17.a, 17.b, 17.c, 17.f, 17.h)

- ☒ Yes
- ☐ Under development
- ☐ No

32. 2.4 cont. **If yes or under development**, please provide details and links as relevant, including the name of ministries and national authorities/entities, as well as affiliated organizations that are involved in the development and implementation of the plan, strategy or the roadmap.

Same as question 2.3.

33. 2.5 In your country, are there policies and/or strategies that promote open science in line with the 2021 Recommendation at **institutional** level, including in the context of research-performing institutions, universities, scientific unions and associations and learned societies? (ref.: (ii) 17.d, 17.e, 17.g)

- ☒ Yes
- ☐ Under development
- ☐ No

34. 2.5 cont. **If yes**, please provide more information, including the number of policies, name of the institute(s) that has/have developed the policy(s) and elements of open science included in the policy (please consider policies and strategies addressing all elements of open science, including citizen and participatory science, or co-production of knowledge with multiple actors). To view the elements of open science, see: <https://unesdoc.unesco.org/ark:/48223/pf0000379949/PDF/379949eng.pdf.multi.nameddest=20/p.nameddest=20/.page=9>

Yes, all Norwegian institutions for higher education have open science strategies, for example Ja flere inst har vel dette? The Norwegian University of Science and Technology (NTNU) has a Policy for Open Science that applies to all activities at the institution, including research, artistic research, teaching, and dissemination, the University of Bergen (UiB) has a Policy for Open Science covering open access to research publications, artistic research, research data, open innovation, open educational resources, and citizen science, the University of Oslo (UiO) has had an Open Access policy in place for over a decade.

35. 2.6 In your country, are there specific funding mechanisms[i] for open science at the national level? (ref.: (ii) 17.j, (iii) 18.j, (iv) 19.c)

[i] A funding mechanism refers to a policy instrument or process through which financial resources are allocated or provided for a specific purpose. Some examples are block funding, research grants, support for technological poles and centres of excellence, support for science parks and innovation centres, Infrastructure grants (for research facilities, labs, instruments), communication and outreach funds, innovation funds, loans and tax credits scholarships, studentships, fellowships, trust funds, sectoral funds.

- ☐ Yes
- ☐ Under development
- ☒ No

36. 2.6 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to develop such funding mechanisms.

No. We however have national negotiations for publish and read agreements for Norwegian institutions, coordinated by SIKT

37. 2.7 1.1 In your country, have open science practices[i] been integrated in existing research funding mechanisms?

[i] Examples can include sharing open scientific knowledge (publications, research data, educational resources, software and hardware) with other scientists and with the public, sharing or using open infrastructures, collaboration with other researchers, with national and local societal actors such as policy makers, or sectors such as industry, agriculture, and health, and collaboration and open dialogue with indigenous peoples and local communities.

☒ Yes

☐ No

38. 2.7 cont. **If yes**, please provide details and links as relevant.

Yes, as mentioned above the RCN is assessing open science practices as part of the overall grant assessment: Assessment of open science in grant applications

39. 2.8 Have efforts been made or are foreseen to be undertaken by end of 2025 in your country to foster equitable public-private partnerships on open science in line with the 2021 Recommendation? (ref.: (ii) 17.i)

☐ Yes

☒ No

40. 2.8 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

41. 2.9 Is there a national monitoring framework for open science in your country? Or are there specific indicators on open science included in the national monitoring and evaluation framework for STI policy (ref.: (ii) 17.j, 23.c)

Yes

Under development

No

42. 2.9 cont. **If yes or under development**, please provide details and links as relevant.

Yes, open access to research publications are monitored and published yearly at this webpage:
Open Science | Nasjonal oversikt

Part 3. INVESTING IN OPEN SCIENCE INFRASTRUCTURES AND SERVICES

43. 3.1 What is the latest official data for your country's percentage of national gross domestic product (GDP) dedicated to research and development expenditure? Please also indicate the year of publication of this data, and to which year(s) it refers. (ref.: (iii) 18.a)

3.2 Estimated allocations for R&D in the adopted state budget for 2024 are calculated to amount to 0.94 per cent of GDP (indicator report 2024)

44. 3.2 What is the latest official data for the percentage of your country's population that have access to reliable internet and bandwidth? Please also indicate the year of publication of this data, and to which year(s) it refers. (ref.: (iii) 18.b)

According to Statistics Norway (SSB), 98 percent of the Norwegian population has access to the internet at home. When it comes to bandwidth, statistics show that 94 percent of households have a broadband connection

45. 3.3 Are there national research and education networks (NRENs)[i] active in the country? (ref.: (iii) 18.c)

[i] A national research and education network (NREN) is a specialised internet service provider dedicated to supporting the needs of the research and education communities within a country.

☒ Yes

☐ No

46. 3.3 cont. **If yes**, please provide more information and links as relevant, and indicate to which open science actors in your country those networks are accessible.

The Research and Education Network is among Norway's most powerful network infrastructures, and is part of a worldwide network. It is used by more than 150 organizations in research and education. National Research and Education Network – Uninett

47. 3.4 Are there national or institutional open science infrastructures[i] in your country? (ref.: (iii) 18.d, 18.e, 18.k, 18.l, 18.m)

[i] Some examples of open science infrastructures include major shared scientific equipment or sets of instruments, open computational and data manipulation service infrastructures that enable collaborative and multidisciplinary data analysis, open science platforms and repositories for publications, research data and source codes, archives, open bibliometrics and scientometrics systems for assessing and analysing scientific domains, open laboratories, software forges and virtual research environments, open innovation testbeds, incubators, science museums, science parks and infrastructure for non-digital materials.

Yes

Under development

No

48. 3.4 cont. **If yes or under development**, please indicate which type(s) of infrastructure:

federated information technology infrastructure for open science, including high-performance computing, cloud computing and data storage

community managed infrastructures, protocols and standards, for example those that support bibliodiversity and engagement with society

platforms for exchanges and co-creation of knowledge between scientists and society

community-based monitoring and information systems to complement national, regional and global data and information systems

49. 3.4 cont. **If yes or under development**, for each infrastructure, please provide links as relevant and more information with regard to their compliance with the 2021 Recommendation on Open Science in terms of inclusivity, accessibility, interoperability, community governance, FAIR (Findable, Accessible, Interoperable, and Reusable) and CARE (Collective Benefit, Authority to Control, Responsibility and Ethics) principles. Please indicate if the infrastructure is non-commercial.

Sigma2 AS is responsible for providing the national e-infrastructure for computational science in Norway, and offers services in high-performance computing (supercomputing) and large-scale data storage for research and educational purposes. □ Front page | Sigma2 and RDA Norway: <https://www.rd-alliance.org/groups/rda-norway/activity/>

50. 3.5 Does your country host or fund any federated regional or international information technology infrastructure for open science? (ref.: (iii) 18.e, 18.f)

☒ Yes

☐ No

51. 3.5. cont. **If yes**, please provide links as relevant and more information, including the name of the infrastructure, date of establishment, language, target groups and beneficiaries, governance/community agreements, scope (e.g. research areas, elements of open science, stage of research, accessibility to all the relevant users in the region or internationally).

<https://www.sigma2.no/>

52. 3.6 Is your country involved in any North-South, North-South-South and South-South collaborations to optimize infrastructure use and joint strategies for shared, multinational, regional and national open science platforms? (ref.: (iii) 18.g)

☐ Yes

☒ No

Part 4. INVESTING IN HUMAN RESOURCES, TRAINING, EDUCATION, DIGITAL LITERACY

AND CAPACITY BUILDING FOR OPEN SCIENCE

53. 4.1 Has systematic capacity building on open science taken place in higher education and/or research performing institutions in your country? (ref.: (iv) 19.a, 19.c)

☒ Yes

☐ No

54. 4.1 cont. **If yes**, please indicate if those capacity building initiatives are formal or informal and provide more information and links as relevant.

Yes, most higher education institutions have capacity building courses related to open science. For example: UiO - Research data - University of Oslo Library UiB- Research Data Management in the active phase of research | University of Bergen Library | UiB UiT - Research data management at UiT: An introduction | UiT NTNU- Research Data Management and Open Science | DIGIT - Platform for online courses In addition, the the Norwegian Directorate for Higher Education and Skills (HK-dir) is part of the Skills for EOSC project: About

55. 4.2 Have capacity building programmes for policy makers on how to integrate core values and principles of open science in STI policies and strategies taken place in your country?

☐ Yes

☒ No

56. 4.2 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

57. 4.3 Has a framework of open science competencies been incorporated into higher education research skills curricula in your country, or is it foreseen by the end of 2025? (ref.: (iv) 19.b)

☒ Yes

☐ No

58. 4.3 cont. **If yes**, please provide more information and links as relevant.

Many Norwegian institutions for higher education have adapted the Agreement on Reforming Research Assessment. Nor-CAM- A Norwegian toolbox for recognition and rewards for academic careers, is a National Chapter in the Coalition for advancing research assessment, and many Norwegian institutions are currently adapting the Nor-CAM framework into their assessment frameworks for hiring and promoting researchers. [nor-cam-a-tool-box-for-assessment-and-rewards.pdf](#)

59. 4.4 Are open educational resources[i] as defined in the 2019 Recommendation on Open Educational Resources, used as an instrument for open science capacity building in your country in line with the 2019 Recommendation mentioned above? (ref.: (iv) 19.d)

[i] Open Educational Resources are learning, teaching and research materials in any format and medium that reside in the public domain or are under copyright that have been released under an open license, that permit no-cost access, re-use, re-purpose, adaptation and redistribution by others (2019 Recommendation on Open Educational Resources)

- ☐ Yes
- ☒ Partly
- ☐ No

60. 4.5 Have there been any initiatives in your country to support science communication in line with open science value and principles with a view to the dissemination of scientific knowledge to researchers of different disciplines, decision-makers and the public at large? (ref.: (iv) 19.e)

- ☒ Yes
- ☐ No

61. 4.5 cont. **If yes**, please provide more information and links as relevant.

Most institutions of higher education work with such initiatives UHR-konferansen 2024: Åpen forskning, åpen utdanning, åpent samfunn - Universitets- og høyskolerådet

Part 5. FOSTERING A CULTURE OF OPEN SCIENCE AND ALIGNING INCENTIVES FOR OPEN SCIENCE

62. 5.1 Have there been any initiatives at the national or institutional level, e.g. by universities and/or research performing institutions, to review the existing research assessment and evaluation processes in order to align them with open science principles and values or are they foreseen by the end of 2025? (ref.: (v) 20.b, 20c, 20i)

☒ Yes

☐ No

63. 5.1 cont. **If yes**, please provide more information and links as relevant.

Many Norwegian institutions for higher education have adapted the Agreement on Reforming Research Assessment. Nor-CAM- A Norwegian toolbox for recognition and rewards for academic careers, is a National Chapter in the Coalition for advancing research assessment, and many Norwegian institutions are currently adapting the Nor-CAM framework into their assessment frameworks for hiring and promoting researchers. [nor-cam-a-tool-box-for-assessment-and-rewards.pdf](#)

64. 5.2 Have specific clauses that recognize open science practices, including sharing, collaborating and engaging with other researchers and societal actors beyond the scientific community, or dialogue with other knowledge systems, been incorporated in the career evaluation and progression systems or are foreseen by the end of 2025? (ref.: (v) 20.a, 20.c, 20.d)

☒ Yes

☐ No

65. 5.2 cont. **If yes**, please provide details and links as relevant.

• Different institutions are adapting Nor-CAM, eks: Universitetet i Oslo: Veileder for medlemmer av sakkyndig komite / Guide for members of expert committees • Oslo Universitetssykehus: OUS-CAM (Norsk og engelsk versjon) • Universitetet i Stavanger: UiS-KVM Kompetansevurderingsmatrise for undervisnings- og forskerstillinger

66. 5.3 Have there been any initiatives in your country to recognize and reward open science practices or are they foreseen by the end of 2025? (ref.: (v) 20.a, 20.b, 20.c, 20.e, 20.f, 20.g, 20h)

☒ Yes

☐ No

67. 5.3 cont. **If yes**, for each initiative, please provide more information, including on the stakeholders[i] that are involved or lead the initiative, and links as relevant.

[i] For example, research funders, universities, research institutions, learned societies, scientific publishers and journal editorial boards.

Yes, as mentioned above the RCN is assessing open science practices as part of the overall grant assessment. Open science practices such as early open sharing of research results can be included in the applicants CVs: Assessment of open science in grant applications.

68. 5.4 Have there been any unintended negative consequences[i] of open science practices reported in your country? (ref.: (v) 20)

[i] For example, predatory behaviours, data migration, exploitation and privatization of research data, increased costs for scientists and high article processing charges associated with certain business models in scientific publishing that may be causes of inequality for the scientific communities around the world and, in some cases, the loss of intellectual property and knowledge.

☒ Yes

☐ No

69. 5.4 cont. **If yes**, please provide more information and specify if there is a strategy or plan to preventing and mitigating such consequences.

This is mostly related to reporting of predatory journals to the Norwegian Register of Scientific Publishing Channels which is a register of recommended publication channels and as a gatekeeper against unreliable channels and those operating in the gray-zone

Part 6. PROMOTING INNOVATIVE APPROACHES FOR OPEN SCIENCE AT DIFFERENT STAGES OF THE SCIENTIFIC PROCESS

70. 6.1 Have there been any initiatives at the national or institutional level that promote innovative, participatory methodological or procedural changes at different stages of the research cycle to increase the openness of the entire scientific process? (ref.: (vi) 21)

- ☐ YES, at the national level
- ☐ YES, at the institutional level
- ☒ YES, at both the national and institutional levels
- ☐ No

71. 6.1 cont. **If yes**, please indicate which of the recommended actions they address:

- ☒ promotion of pre-prints
- ☒ exploration of open peer-review practices
- ☒ valuing and sharing of negative scientific results and associated data
- ☒ participatory methods that value inputs from societal actors, e.g. citizen science, crowdsourcing scientific projects
- ☐ development of participatory strategies for identifying the needs of marginalized communities and highlighting socially relevant issues to be incorporated into research agendas
- ☒ promoting open innovation practices
- ☐ Other

72. 6.1. cont. **If yes**, please provide more information and links as relevant

Open peer review and pre-prints: □ The RCN supports the expansion of Open Research Europe from 2026: A collective commitment to strengthen Open ... | Open Research Europe, Negative results: □ All trials and studies funded by the Foundation Dam that fund health research must preregister in the foundation's own registry at Open Science Framework (OSF). Preregistration in OSF - Stiftelsen Dam, □ The RCN coordinates a national network for citizen science research: Nasjonalt nettverk for folkeforskning, □ The RCN has participated in the European PRO-Ethics project that has developed ethical guidelines for and Guidelines for Participatory Processes in the Activities of Research Funding Organizations: Pro Ethics | Welcome

Part 7. PROMOTING INTERNATIONAL AND MULTI-STAKEHOLDER COOPERATION IN THE CONTEXT

OF OPEN SCIENCE AND WITH VIEW TO REDUCING DIGITAL, TECHNOLOGICAL AND KNOWLEDGE GAPS

73. 7.1 How is your country promoting and facilitating international scientific collaborations on open science as outlined in the 2021 Recommendation on Open Science? (ref.: (vii) 22.a)

The RCN is actively participating in cOAlition S, CoARA, Science Europe and the Global Research Council

74. 7.2 Does your country have a strategy or a plan for stimulating cross-border multi-stakeholder collaboration on open science, including with regards to exchange of best practices, capacity building and metrics for open science? (ref.: (vii) 22.b, 22.e, 22.f)

☒ Yes

☐ No

75. 7.2 cont. **If yes**, please provide links as relevant and more information.

Through Science Europe and GRC

76. 7.3 Is your country involved in any discussion on the establishment of regional and international funding mechanisms for open science? (ref.: (vii) 22.c)

☐ Yes

☒ No

77. 7.3 cont. **If no**, please, if possible, briefly explain the reason and the difficulties or obstacles in this area and indicate if there are plans to do so.

Not at the national level, but as a member of cOAlition S and Science Europe the RCN discuss such matters in relation to e.g diamond publishing: Home - DIAMAS

Part 8. GENERAL CONSIDERATIONS

78. 8.1 Are there any specific external causes that may impede the implementation of the 2021 UNESCO Recommendation on Open Science in your country?

☐ Yes

☒ No

79. ANY OTHER COMMENTS: If you wish, you may enter any additional comments or information here. You may also contact openscience@unesco.org
